The Trust

The Trust is a Delaware statutory trust organized on May 29, 2001, and is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. The Fund is one series formed by the Trust. The Fund is a diversified series and has its own investment objective and policies. Shares of other series of the Trust are offered in separate prospectuses and SAs. The Trust may register additional series and offer shares of a new fund or share class under the Trust at any time.

The Trust is authorized to issue an unlimited number of interests (or shares). Interests in the Fund are represented by shares of beneficial interest (“Shares”) each with a par value of \$0.001. Each share of the Trust has equal voting rights and liquidation rights, and is voted in the aggregate and not by the series or class of shares except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matters affect only the interests of a particular series or class of shares. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular class. The Trust does not normally hold annual meetings of shareholders. The Trust’s Board of Trustees (the “Board” or the “Board of Trustees”) shall promptly call and give notice of a meeting of shareholders for the purpose of voting upon removal of any trustee when requested to do so in writing by shareholders holding 10% or more of the Trust’s outstanding shares.

The Fund offers and issues Shares at its net asset value (“NAV”) only in aggregations of a specified number of Shares (each, a “Creation Unit”). The Fund generally offers and issues Shares in exchange for a basket of securities (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”). The Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. Shares are listed on the Cboe BZX Exchange, Inc. (the “Exchange”) and trade on the Exchange at market prices that may differ from the Shares’ NAV. Shares are also redeemable only in Creation Unit aggregations, primarily for a basket of Deposit Securities together with a Cash Component. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, Shares are not redeemable securities.

Each share of the Fund represents an equal proportionate interest in the assets and liabilities belonging to the Fund and is entitled to such distributions out of the income belonging to the Fund as are declared by the Board of Trustees. The Board of Trustees has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interests in the assets belonging to that series and the rights of shares of any other series are in no way affected. Additionally, in event of any dissolution or liquidation of the Fund, the shareholders of the Fund being liquidated are entitled to receive a pro rata distribution out of the net assets, net of the liabilities, belonging to that Fund. Expenses attributable to any series or class are borne by that series or class. Any general expenses of the Trust not readily identifiable as belonging to a particular series or class are allocated by, or under the direction of, the Board of Trustees on the basis of relative net assets, number of shareholders or other equitable method. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash at least equal to a specified

percentage of the value of the missing Deposit Securities as set forth in the Participant Agreement (as defined below). The Trust may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities. As is the case with other publicly traded securities, brokers' commissions on transactions in the secondary market will be based on negotiated commission rates at customary levels.

The assets of the Fund received for the issue or sale of its shares, and all income, earnings, profits and proceeds thereof, subject only to the rights of creditors, shall constitute the underlying assets of the Fund. In the event of the dissolution or liquidation of the Fund, the shareholders of the Fund are entitled to share pro rata in the net assets of the Fund available for distribution to shareholders.

PT Asset Management, LLC (DBA: PTAM) (the "Adviser") serves as the investment adviser to the Fund. The Adviser also serves as investment adviser to the Performance Trust Total Return Bond Fund (f/k/a Performance Trust Strategic Bond Fund), Performance Trust Municipal Bond Fund and Performance Trust Multisector Bond Fund (f/k/a Performance Trust Credit Fund), each an open-end mutual fund series of the Trust. See the section entitled "Management of the Fund - Investment Adviser" in this SAI for more information about the Adviser.

Investment Policies, Strategies and Associated Risks

Investment Objective

The Fund seeks total return from income and preservation of principal. The Fund's investment objective and strategies may be changed without the approval of the Fund's shareholders upon approval by the Board of Trustees and 60 days' written notice to shareholders.

Diversification

The Fund is diversified. Under applicable federal laws, to qualify as a diversified fund, the Fund, with respect to 75% of its total assets, may not invest more than 5% of its total assets in any one issuer and may not hold more than 10% of the securities of one issuer. The remaining 25% of the Fund's total assets does not need to be "diversified" and may be invested in securities of a single issuer, subject to other applicable laws. The diversification of the Fund's holdings is measured at the time the Fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund's total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers.

Additional Information about Investment Strategies, Policies and Risks

There is no assurance that the Fund will achieve its investment objective. The following discussion supplements the description of the Fund's investment objective and principal investment strategies set forth in the Prospectus. Except for the fundamental investment limitations listed below (see "Investment Restrictions"), the Fund's investment strategies and policies are not fundamental and may be changed by sole action of the Board of Trustees, without shareholder approval. While the Fund is permitted to hold securities and engage in various strategies as described hereafter, they are not obligated to do so.

Whenever an investment policy or investment restriction states a maximum percentage of the Fund's assets that may be invested in any security, or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and

as a result of the Fund's acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered when determining whether an investment complies with the Fund's investment policies and investment restrictions set forth herein or in the Prospectus. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not, buy. If this happens, the Fund will sell such investments as soon as practicable while trying to maximize the return to its shareholders. Please note, however, that the guidance referenced in the first two sentences of this paragraph does not apply to the Fund's investments in illiquid securities or the Fund's borrowing of money.

Municipal Securities

The Fund invests in municipal securities, which are debt obligations issued by or on behalf of governmental entities throughout the United States and its territories to obtain funds for various public purposes, including the construction of a wide range of public facilities, the refunding of outstanding obligations, the payment of general operating expenses and the extension of loans to public institutions and facilities.

Opinions relating to the validity of municipal securities and to the exemption of interest thereon from federal income tax are rendered by bond counsel to the respective issuers at the time of issuance. Neither the Fund nor the Adviser will review the proceedings relating to the issuance of municipal securities or the basis for such opinions.

Certain municipal securities held by the Fund may be insured at the time of issuance as to the timely payment of principal and interest. The insurance policies will usually be obtained by the issuer of the municipal security at the time of its original issuance. In the event the issuer defaults on interest or principal payment, the insurer will be notified and will be required to make payment to the bondholders. There is, however, no guarantee that the insurer will meet its obligations. In addition, such insurance will not protect against market fluctuations caused by changes in interest rates and other factors, including credit downgrades, supply and demand. The Fund may, from time to time, invest more than 25% of its assets in municipal securities covered by insurance policies.

The payment of principal and interest on most securities purchased by the Fund will depend upon the ability of the issuers to meet their obligations. An issuer's obligations under its municipal securities are subject to the provisions of bankruptcy, insolvency, and other laws affecting the rights and remedies of creditors, such as the Federal Bankruptcy Code, and laws, if any, which may be enacted by federal or state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations or upon the ability of municipalities to levy taxes. The power or ability of an issuer to meet its obligations for the payment of interest on, and principal of, its municipal securities may be materially adversely affected by litigation or other conditions.

Certain types of municipal securities (private activity bonds) have been or are issued to obtain funds to provide privately operated housing facilities, pollution control facilities, convention or trade show facilities, mass transit, airport, port or parking facilities and certain local facilities for water supply, gas, electricity or sewage or solid waste disposal. Private activity bonds are also issued on behalf of privately held or publicly owned corporations in the financing of commercial or industrial facilities. State and local governments are authorized in most states to issue private activity bonds for such purposes in order to encourage corporations to locate within their communities. The principal and

interest on these obligations may be payable from the general revenues of the users of such facilities.

Municipal securities purchased by the Fund may be backed by letters of credit issued by foreign and domestic banks and other financial institutions. Such letters of credit are not necessarily subject to federal deposit insurance and adverse developments in the banking industry could have a negative effect on the credit quality of the Fund's portfolio securities and its ability to maintain a stable net asset value and share price. Letters of credit issued by foreign banks, like other obligations of foreign banks, may involve certain risks in addition to those of domestic obligations.

The Fund may purchase put options on municipal securities. A put gives the Fund the right to sell a municipal security at a specified price at any time before a specified date. A put will be sold, transferred or assigned only with the related municipal security. The Fund may acquire puts only to enhance liquidity, shorten the maturity of the related municipal security or permit the Fund to invest its assets at more favorable rates. The aggregate price of a security subject to a put may be higher than the price which otherwise would be paid for the security without such an option, thereby increasing the security's cost and reducing its yield.

From time to time, proposals have been introduced before Congress for the purpose of restricting or eliminating the federal income tax exemption for interest on municipal securities. For example, under the Internal Revenue Code of 1986, as amended (the "Code"), interest on certain private activity bonds must be included in a noncorporate investor's alternative minimum taxable income. The Adviser cannot, of course, predict what legislation, if any, may be proposed in the future as regards the federal income tax status of interest on municipal securities, or which proposals, if any, might be enacted. Such proposals, while pending or if enacted, might materially and adversely affect the availability of municipal securities for investment by the Fund and the liquidity and value of its portfolio. In such an event, the Adviser would reevaluate the Fund's investment objective and policies and consider possible changes in its structure or possible dissolution.

Municipal Lease Obligations

The Fund may acquire municipal lease obligations that are issued by a state or local government authority to acquire land and a wide variety of equipment and facilities. These obligations typically are not fully backed by the municipality's credit, and their interest may become taxable if the lease is assigned. If the funds are not appropriated for the following year's lease payments, the lease may terminate, with the possibility of default on the lease obligation and significant loss to the Fund. Certificates of participation in municipal lease obligations or installment sale contracts entitle the holder to a proportionate interest in the lease-purchase payments made. The Adviser determines and monitors the liquidity of municipal lease obligations (including certificates of participation) under guidelines approved by the Board requiring the Adviser to evaluate the credit quality of such obligations and report on the nature of and the Fund's trading experience in the municipal lease market. Under the guidelines, municipal lease obligations that are not readily marketable and transferable are treated as illiquid. In making a determination that a municipal lease obligation is liquid, the Adviser may consider, among other things (i) whether the lease can be canceled; (ii) the likelihood that the assets represented by the lease can be sold; (iii) the strength of the lessee's general credit; (iv) the likelihood that the municipality will discontinue appropriating funds for the leased property because the property is no longer deemed essential to the operations of the municipality; and (v) availability of legal recourse in the event of failure to appropriate. The Fund will not knowingly invest more than 15% of the value of its net assets in securities, including municipal leases, that are illiquid.

Municipal Notes

Municipal notes include, but are not limited to, tax anticipation notes (“TANs”), bond anticipation notes (“BANs”), revenue anticipation notes (“RANs”) and construction loan notes. Notes sold as interim financing in anticipation of collection of taxes, a bond sale or receipt of other revenues are usually general obligations of the issuer.

An uncertainty in a municipal issuer’s capacity to raise taxes as a result of such events as a decline in its tax base or a rise in delinquencies could adversely affect the issuer’s ability to meet its obligations on outstanding TANs. Furthermore, some municipal issuers mix various tax proceeds into a general fund that is used to meet obligations other than those of the outstanding TANs. Use of such a general fund to meet various obligations could affect the likelihood of making payments on TANs.

The ability of a municipal issuer to meet its obligations on its BANs is primarily dependent on the issuer’s adequate access to the longer term municipal bond market and the likelihood that the proceeds of such bond sales will be used to pay the principal of, and interest on, BANs.

A decline in the receipt of certain revenues, such as anticipated revenues from another level of government, could adversely affect an issuer’s ability to meet its obligations on outstanding RANs. In addition, the possibility that the revenues would, when received, be used to meet other obligations could affect the ability of the issuer to pay the principal of, and interest on, RANs.

The values of outstanding municipal securities will vary as a result of changing market evaluations of the ability of their issuers to meet the interest and principal payments (*i.e.*, credit risk). Such values also will change in response to changes in the interest rates payable on new issues of municipal securities (*i.e.*, market risk).

Stand-By Commitments

The Fund may acquire “stand-by commitments” with respect to municipal securities held in its portfolio. Under a “stand-by commitment” a dealer agrees to buy from the Fund, at the Fund’s option, specified municipal securities at a specified price. A “stand-by commitment” acquired by the Fund may also be referred to in this SAI as a “put” option.

The amount payable to the Fund upon its exercise of a “stand-by commitment” is normally (i) the Fund’s acquisition cost of the municipal securities (excluding any accrued interest which the Fund paid on their acquisition), less any amortized market premium or plus any amortized market or original issue discount during the period the Fund owned the securities; plus (ii) all interest accrued on the securities since the last interest payment date during that period. A stand-by commitment may be sold, transferred or assigned by the Fund only with the instrument involved.

The Fund expects that “stand-by commitments” will generally be available without the payment of any direct or indirect consideration. However, if necessary or advisable, the Fund may pay for a “stand-by commitment” either separately in cash or by paying a higher price for the portfolio securities which are acquired subject to the commitment (thus reducing the yield to maturity otherwise available for the same securities). The total amount paid in either manner for outstanding “stand-by commitments” held by the Fund will not exceed 1/2 of 1% of the value of its total assets calculated immediately after each “stand-by commitment” is acquired.

The Fund intends to enter into “stand-by commitments” only with dealers, banks and broker-dealers which, in the Adviser’s opinion, present minimal credit risks. The Fund’s reliance upon the credit of these dealers, banks and broker-dealers is secured by the value of the underlying municipal securities that are subject to a commitment.

The Fund would acquire “stand-by commitments” solely to facilitate portfolio liquidity and do not intend to exercise its rights thereunder for trading purposes. The acquisition of a “stand-by commitment” would not affect the valuation or assumed maturity of the underlying municipal securities, which would continue to be valued in accordance with the ordinary method of valuation employed by the Fund. “Stand-by commitments” which would be acquired by the Fund would be valued at zero in determining net asset value. Where the Fund paid any consideration directly or indirectly for a “stand-by commitment” its cost would be reflected as unrealized depreciation for the period during which the commitment was held by the Fund.

Variable and Floating Rate Instruments

Municipal securities purchased by the Fund may include variable and floating rate instruments issued by industrial development authorities and other governmental entities. If such instruments are unrated, they will be determined by the Adviser (under the supervision of the Board of Trustees) to be of comparable quality at the time of purchase to investment grade. While there may be no active secondary market with respect to a particular variable or floating rate demand instrument purchased by the Fund, the Fund may (at any time or during specified periods not exceeding thirteen months, depending upon the instrument involved) demand payment in full of the principal of the instrument and has the right to resell the instrument to a third party. The absence of such an active secondary market, however, could make it difficult for the Fund to dispose of a variable or floating rate demand instrument if the issuer defaulted on its payment obligation or during periods that the Fund is not entitled to exercise its demand rights, and the Fund could, for these or other reasons, suffer a loss with respect to such instruments. Inverse floating rate securities are similar to floating rate securities except that their interest rates vary inversely from the market rate of interest to which the inverse floater is indexed. Inverse floating rate securities tend to exhibit greater price volatility than other floating rate securities.

With respect to the variable and floating rate instruments that may be acquired by the Fund, the Adviser will consider the earning power, cash flows and other liquidity ratios of the issuers and guarantors of such instruments and, if the instrument is subject to a demand feature, will monitor their financial status to meet payment on demand. In determining average weighted portfolio maturity, an instrument will usually be deemed to have a maturity equal to the longer of the period remaining to the next interest rate adjustment or the time the Fund can recover payment of principal as specified in the instrument. Variable U.S. Government obligations held by the Fund, however, will be deemed to have maturities equal to the period remaining until the next interest rate adjustment.

Debt Securities

The Fund’s investments in debt securities may include obligations of any rating or maturity. The Fund may invest in investment-grade debt securities and lower-rated debt securities (commonly known as “junk bonds”). Lower-rated or high yield debt securities include corporate high yield debt securities, zero-coupon securities, payment-in kind securities and strips. Investment-grade bonds are those rated as “investment grade” by a nationally recognized statistical rating organization. The Fund may also invest in unrated securities.

Junk Bonds

Junk bonds generally offer higher return potential than is available for higher grade issues. Issuers of high-yield junk bonds are more likely to experience financial difficulties that may lead to a weakened capacity to make principal and interest payments than issuers of higher grade securities. Issuers of junk bonds are often highly leveraged and are more vulnerable to changes in the economy, such as a recession or rising interest rates, which may affect their ability to meet their interest or principal payment obligations. During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and could increase the possibility of default. In addition, the market for lower rated debt securities has expanded rapidly in recent years, and its growth has paralleled a long economic expansion. At times in recent years, the prices of many lower rated debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on lower rated debt securities rose dramatically, but the higher yields did not reflect the value of the income stream that holders of such securities expected, but rather the risk that such securities would lose a substantial portion of their value as a result of the issuer's financial restructuring or default. There can be no assurance that such declines will not recur. The market for lower rated debt issues generally is thinner and less active than that for higher quality securities, which may limit the Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of lower-rated securities, especially in a thinly traded market. Changes by recognized rating services in their ratings of a debt security affect the value of these investments. The Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Adviser will monitor the investment to determine whether continued investment in the security will further the Fund's investment objective.

Unrated Debt Securities

Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their debt securities. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed by the Adviser to determine whether to purchase unrated bonds for the Fund.

Corporate Debt Securities

The Fund may invest in corporate debt securities. Corporate debt securities are debt securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small, medium and large capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry fixed, variable, or floating rates of interest. Because of the wide range of types and maturities of corporate debt securities, as well as the range of creditworthiness of their issuers, corporate debt securities have widely varying potentials for return and varying risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal but carries relatively limited risk. On the other hand, a long-term corporate note issued by a

small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt securities may vary based on the priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. The issuer may not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities falls when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Auction Rate Securities

Auction Rate Securities ("ARS") are long-term, variable-rate bonds tied to short-term interest rates. ARS have a long-term nominal maturity with interest rates reset through a modified Dutch auction, at predetermined short-term intervals, usually seven, 28 or 35 days. ARS trade at par and are "callable" (meaning that the issuer may require the bondholder to sell the bond back to the issuer) at par on any interest payment date. Common issuers of ARS include municipalities, non-profit hospitals, utilities, housing finance agencies, student loan finance authorities and universities. Credit risk associated with ARS is similar to the default risk associated with other municipal and corporate bond issuers. Bond insurance is usually used to lower the credit risk of ARS. ARS are subject to liquidity risk if the auction process used to reset the interest rates fails because there are more orders to sell the ARS than bids to purchase the ARS. If an auction process fails, existing holders of ARS would have to continue to hold their ARS until there were a sufficient number of bids to purchase the ARS at the next auction to calculate the interest rate reset. Since mid-February 2008, most auctions have failed due to insufficient demand for securities and have continued to fail for an extended period of time. Failed auctions may adversely impact the liquidity of ARS investments. Although some issuers of ARS are redeeming or are considering redeeming these securities, such issuers are not obligated to do so. Therefore, there is no guarantee that a liquid market will exist for ARS at a time when the Fund wishes to dispose of these securities.

Zero-Coupon Securities

The Fund may invest in zero-coupon bonds as part of its investment strategy. Zero-coupon securities make no periodic interest payments but are sold at a deep discount to their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The discount varies depending on the time remaining until maturity, as well as market interest rates, the liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on his or her investment. Because zero-coupon securities bear no interest and compound semiannually at the rate fixed at the time of issuance, their value generally is more volatile than the value of other debt securities. Since zero-coupon bondholders do not receive interest payments, their value will be more sensitive to interest rate movements than bonds that pay interest on a current basis all else equal. An investment in zero-coupon and delayed interest securities may cause the Fund to recognize income, prior to the Fund's receipt of any cash payments on its investment, and therefore

the Fund may be required to make distributions to shareholders before the Fund receives any cash payments on its investment. As a result, the Fund may have to dispose of its portfolio investments under disadvantageous circumstances in order to generate sufficient cash to satisfy the distribution requirements for maintaining its status as a regulated investment company (“RIC”) under Section 851(a) of the Code.

U.S. Government Obligations

The Fund may invest in U.S. Government obligations. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government. U.S. Treasury obligations differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis.

Payment of principal and interest on U.S. Government obligations is backed by the full faith and credit of the United States. U.S. Government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. Government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Agency Obligations

The Fund may make investments in agency obligations, such as the Farmers Home Administration, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal Farm Credit Banks, Federal Land Banks, Federal Housing Administration, Government National Mortgage Association (“GNMA”), commonly known as “Ginnie Mae,” Federal National Mortgage Association (“FNMA”), commonly known as “Fannie Mae,” and Federal Home Loan Mortgage Corporation (“FHLMC”), commonly known as “Freddie Mae”. Some, such as those of the Export-Import Bank of United States, are supported only by the right of the issuer to borrow from the Treasury; others, such as those of the FNMA and FHLMC, are supported by only the discretionary authority of the U.S. Government to purchase the agency’s obligations; still others are supported only by the credit of the instrumentality. No assurance can be given that the U.S. Government would provide financial support to U.S. Government-sponsored instrumentalities because they are not obligated by law to do so. As a result, there is a risk that these entities may default on a financial obligation. For instance, in September 2008, at the direction of the U.S. Treasury, FNMA and FHLMC were placed into conservatorship under the Federal Housing Finance Agency (“FHFA”), an independent regulator. If the conservatorship is terminated, obligations issued by FNMA and FHLMC will no longer have the protection of the U.S. Treasury.

Short Sales

The Fund may engage in short sales as a non-principal strategy. In a short sale, the Fund sells a security it does not own, in anticipation of a decline in the market value of the security. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing it at the market price at the time of replacement. This price may be more or less than the price at which the security was sold by the Fund. The Fund will incur a loss on a short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaced the borrowed security. The Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, payments in

lieu of dividends, interest or expenses the Fund may be required to pay in connection with the short sale.

Typically, the Fund will segregate liquid assets, which are marked-to-market daily, equal to the difference between (a) the market value of the securities sold short at the time they were sold short and (b) the value of the collateral deposited with the broker in connection with the short sale (not including the proceeds from the short sale). While the short position is open, the Fund must maintain segregated assets at such a level that the amount segregated plus the amount deposited with the broker as collateral equal the current market value of the securities sold short.

If the underlying security in a short sale goes down in price between the time the Fund sells the security and buys it back, the Fund will realize a gain on the transaction. Conversely, if the underlying security goes up in price during the period, the Fund will realize a loss on the short sale transaction. Because the market price of the security sold short could increase without limit, the Fund could be subject to a theoretically unlimited loss. The risk of such price increases is the principal risk of engaging in short sales. In addition, the Fund's investment performance may suffer if the Fund is required to close out a short position earlier than it had intended. This would occur if the securities lender required the Fund to deliver the securities the Fund borrowed at the commencement of the short sale and the Fund was unable to borrow the securities from another securities lender or otherwise obtain the security by other means. Moreover, the Fund may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These expenses negatively impact the performance of the Fund. For example, when the Fund short sells an equity security that pays a dividend, it is obligated to pay the dividend on the security it has sold. However, a dividend paid on a security sold short generally reduces the market value of the shorted security and thus, increases the Fund's unrealized gain or reduces the Fund's unrealized loss on its short sale transaction. To the extent that the dividend that the Fund is obligated to pay is greater than the return earned by the Fund on investments, the performance of the Fund will be negatively impacted. Furthermore, the Fund may be required to pay a premium or interest to the lender of the security. The foregoing types of short sale expenses are sometimes referred to as the "negative cost of carry," and will tend to cause the Fund to lose money on a short sale even in instances where the price of the underlying security sold short does not change over the duration of the short sale. The Fund is also required to segregate other assets on their books to cover their obligation to return the security to the lender which means that those other assets may not be available to meet the Fund's needs for immediate cash or other liquidity.

Mortgage-Backed Securities and Asset-Backed Securities

The Fund may invest in mortgage-backed securities and asset-backed securities as a principal investment strategy. Mortgage-backed securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property, and include single- and multi-class pass-through securities and collateralized mortgage obligations ("CMOs"). Such securities may be issued or guaranteed by U.S. Government agencies or instrumentalities, such as the GNMA, FNMA, FHLMC or by private issuers, generally originators and investors in mortgage loans, including savings associations, mortgage bankers, commercial banks, investment bankers and special purpose entities (collectively, "private lenders").

Mortgage-backed securities issued by private lenders may be supported by pools of mortgage loans or other mortgage-backed securities that are guaranteed, directly or indirectly, by the U.S.

Government or one of its agencies or instrumentalities, or they may be issued without any governmental guarantee of the underlying mortgage assets but with some form of non-governmental credit enhancement. FNMA and FHLMC were formerly government-sponsored corporations owned entirely by private stockholders. As noted above, in September 2008, at the direction of the U.S. Department of the Treasury, FNMA and FHLMC were placed into conservatorship under the FHFA. The U.S. Government also took steps to provide additional financial support to FNMA and FHLMC. No assurance can be given that the U.S. Treasury initiatives with respect to FNMA and FHLMC will be successful or will remain ongoing.

Residential mortgage loans are generally classified into three categories based on the risk profile of the borrower and the property: (i) Prime, (ii) Alternative-A (“Alt-A”), and (iii) Subprime. Prime residential mortgage loans are extended to borrowers who represent a relatively low risk profile through a strong credit history. Subprime loans are made to borrowers who display poor credit histories and other characteristics that correlate with a higher default risk. Alt-A loans are made to borrowers whose risk profile falls between Prime and Subprime. Asset-backed securities represent direct or indirect participation in, or are secured by and payable from, assets such as motor vehicle installment sales contracts, other installment loan contracts, home equity loans, leases of various types of property and receivables from credit card or other revolving credit arrangements. The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk and bankruptcy of the originator or any other affiliated entities and the amount and quality of any credit enhancement of the securities. Payments or distributions of principal and interest on asset-backed debt obligations may be supported by non-governmental credit enhancements including letters of credit, reserve funds, over-collateralization and guarantees by third parties.

The rate of principal payment on mortgage- and asset-backed securities generally depends on the rate of principal payments received on the underlying assets, which in turn may be affected by a variety of economic and other factors. As a result, the yield on any mortgage- or asset-backed security is difficult to predict with precision and actual yield to maturity may be more or less than the anticipated yield to maturity. The yield characteristics of mortgage- and asset-backed debt obligations differ from those of traditional debt obligations. Among the principal differences are that interest and principal payments are made more frequently on mortgage- and asset-backed debt obligations, usually monthly, and that principal may be prepaid at any time because the underlying assets generally may be prepaid at any time. As a result, if these debt obligations or securities are purchased at a premium, a prepayment rate that is faster than expected will reduce yield to maturity, while a prepayment rate that is slower than expected will reduce yield to maturity. Conversely, if these debt obligations or securities are purchased at a discount, a prepayment rate that is faster than expected will increase yield to maturity, while a prepayment rate that is slower than expected will reduce yield to maturity. Mortgage-backed securities available for reinvestment by the Fund are likely to be greater during a period of declining interest rates and, as a result, are likely to be reinvested at lower interest rates than during a period of rising interest rates. Accelerated prepayments on debt obligations or securities purchased at a premium also impose a risk of loss of principal because the premium may not have been fully amortized at the time the principal is prepaid in full. The market for privately issued mortgage-backed securities is smaller and less liquid than the market for government-sponsored mortgage-backed securities.

While asset-backed securities may be issued with only one class of security, many asset-backed securities are issued in more than one class, each with different payment terms. Mortgage-backed securities may be issued with either a single class of security or multiple classes, which are

commonly referred to as a CMO. Multiple class mortgage- and asset-backed securities are issued for two main reasons. First, multiple classes may be used as a method of providing selective credit support. This is accomplished typically through creation of one or more classes whose right to payments on the asset-backed security is made subordinate to the right to such payments of the remaining class or classes. Second, multiple classes may permit the issuance of securities with payment terms, interest rates or other characteristics differing both from those of each other and from those of the underlying assets. Examples include separate trading of registered interest and principal of securities (“STRIPS”) (mortgage- and asset-backed securities entitling the holder to disproportionate interests with respect to the allocation of interest and principal of the assets backing the security), and securities with class or classes having characteristics that mimic the characteristics of non-asset-backed securities, such as floating interest rates (*i.e.*, interest rates that adjust as a specified benchmark changes) or scheduled amortization of principal.

The Fund may invest in stripped mortgage-backed securities, which receive differing proportions of the interest and principal payments from the underlying assets, including interest-only (“IO”) and principal-only (“PO”) securities. IO and PO mortgage-backed securities may be illiquid. The market value of such securities generally is more sensitive to changes in prepayment and interest rates than is the case with traditional mortgage-backed securities, and in some cases such market value may be extremely volatile.

Mortgage- and asset-backed securities, other than as described above, or in which the payment streams on the underlying assets are allocated in a manner different than those described above may be issued in the future. The Fund may invest in such mortgage- and asset-backed securities if such investment is otherwise consistent with its investment objective and policies and with the investment restrictions of the Fund.

If the Fund purchases mortgage- or asset-backed securities that are “subordinated” to other interests in the same mortgage pool, the Fund as a holder of those securities may only receive payments after the pool’s obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the mortgages held by a mortgage pool may substantially limit the pool’s ability to make payments of principal or interest to the Fund as a holder of such subordinated securities, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so called “subprime” mortgages. An unexpectedly high or low rate of prepayments on a pool’s underlying mortgages may have a similar effect on subordinated securities. A mortgage pool may issue securities subject to various levels of subordination, and the risk of non-payment affects securities at each level, although the risk is greater in the case of more highly subordinated securities.

Collateralized Debt Obligations and Collateralized Loan Obligations

The Fund may invest in collateralized loan obligations (“CLOs”), other collateralized debt obligations (“CDOs”) and other similarly structured securities. CLOs and other CDOs are types of asset-backed securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Other CDOs are trusts backed by other types of assets representing obligations of various parties. CLOs and other CDOs may charge management fees and administrative expenses. For CLOs and other CDOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the “equity” tranche, which bears the bulk of defaults from the bonds or loans in the trust and serves to protect the other, more senior tranches

from default in all but the most severe circumstances. Since they are partially protected from defaults, senior tranches from a CLO trust or trust of another CDO typically have higher ratings and lower yields than their underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, CLO or other CDO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CLO or other CDO securities as a class.

The risks of an investment in a CLO or other CDO depend largely on the type of the collateral securities and the class of the instrument in which the Fund invests. Normally, CLOs and other CDOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CLOs and other CDOs may be characterized by the Fund as illiquid securities, however an active dealer market may exist for CLOs and other CDOs allowing them to qualify for Rule 144A transactions. In addition to the normal risks associated with debt or fixed-income securities discussed elsewhere in this SAI and the Fund's Prospectus (e.g., interest rate risk and default risk), CLOs and other CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the risk that the Fund may invest in CLOs or other CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Derivatives

The Fund may invest in derivatives. Derivatives are financial instruments whose value is based on an underlying asset, such as a stock or a bond, an underlying economic factor, such as an interest rate or a market benchmark, such as an index. To the extent the Fund invests in derivatives and the Fund treats such derivatives as bonds and other instruments that have economic characteristics similar to such securities, the Fund will use the market value of the derivative for purposes of meeting the Fund's policy of investing at least 80% of its net assets in bonds and other instruments that have economic characteristics similar to such securities. Unless otherwise stated in the Fund's prospectus, the Fund may use derivatives for risk management purposes, including to gain exposure to various markets in a cost efficient manner, to reduce transaction costs, alter duration or to remain fully invested. The Fund may also invest in derivatives to protect it from broad fluctuations in market prices, interest rates or foreign currency exchange rates (a practice known as "hedging"). When hedging is successful, the Fund will have offset a portion of the depreciation in the value of its portfolio securities by the appreciation in the value of the derivative position. Although techniques other than the sale and purchase of derivatives could be used to control the exposure of the Fund to market fluctuations, the use of derivatives may be a more effective means of hedging this exposure. To the extent that the Fund engages in hedging, there can be no assurance that any hedge will be effective or that there will be a hedge in place at any given time.

Options, Futures and Other Strategies

General

The Fund may use certain options (both traded on an exchange and over-the-counter ("OTC")), futures contracts (sometimes referred to as "futures") and options on futures contracts (collectively, "Financial Instruments") as a substitute for a comparable market position in the underlying security, to attempt to hedge or limit the exposure of the Fund's position, to create a synthetic money market position, for certain tax-related purposes and to effect closing transactions.

The Fund's use of Financial Instruments is subject to applicable regulations of the SEC (including Rule 18f-4 under the 1940 Act), the several exchanges upon which it is traded and the Commodity Futures Trading Commission (the "CFTC"). Under Rule 18f-4, a fund's derivatives exposure is limited through a value-at-risk test. A fund that limits derivatives exposure to 10% of its net assets qualifies as a "limited derivatives user" for purposes of Rule 18f-4. The Fund intends to limit its derivatives exposure to 10% of its net assets and to qualify as a "limited derivatives user." Pursuant to a claim for exemption filed with the National Futures Association on behalf of the Fund, the Fund is not deemed to be a commodity pool operator or a commodity pool under the Commodity Exchange Act and is not subject to registration or regulation as such under the Commodity Exchange Act. In addition, the Fund's ability to use Financial Instruments will be limited by tax considerations.

In addition to the instruments, strategies and risks described below and in the Prospectus, the Adviser may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with the Fund's investment objective and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

Special Risks

The use of Financial Instruments involves special considerations and risks, certain of which are described below. Risks pertaining to particular Financial Instruments are described in the sections that follow.

- (1) Successful use of most Financial Instruments depends upon the Adviser's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Adviser may still not result in a successful transaction. The Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.
- (2) Options and futures prices can diverge from the prices of their underlying instruments. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.
- (3) As described below, the Fund might be required to maintain assets as "cover", maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (e.g., Financial Instruments other than purchased options). If the Fund is unable to close out its positions in such Financial Instruments, it might be required to

continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair the Fund's ability to sell a security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. The Fund's ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the "counterparty") to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

- (4) Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by the Fund on options transactions.

Cover

Transactions using Financial Instruments, other than purchased options, expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (1) an offsetting "covered" position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian, U.S. Bank, N.A. (the "Custodian"), in the prescribed amount as determined daily. Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of the Fund's assets to cover accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Options

The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment and general market conditions. Options that expire unexercised have no value. Options currently are traded on the Chicago Board Options Exchange ("CBOE"), the NYSE Amex and other exchanges, as well as the OTC markets.

By buying a call option on a security, the Fund has the right, in return for the premium paid, to buy the security underlying the option at the exercise price. By writing (selling) a call option and receiving a premium, the Fund becomes obligated during the term of the option to deliver securities underlying the option at the exercise price if the option is exercised. By buying a put option, the Fund has the right, in return for the premium, to sell the security underlying the option at the exercise price. By writing a put option, the Fund becomes obligated during the term of the option to purchase the securities underlying the option at the exercise price.

Because options premiums paid or received by the Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate its obligation under a call or put option that it had

written by purchasing an identical call or put option. This is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option. This is known as a closing sale transaction. Closing transactions permit the Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Risks of Options on Commodities, Currencies and Securities

Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between the Fund and its counter-party (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when the Fund purchases an OTC option, it relies on the counter-party from whom it purchased the option to make or take delivery of the underlying investment upon exercise of the option. Failure by the counter-party to do so would result in the loss of any premium paid by the Fund as well as the loss of any expected benefit of the transaction.

The Fund's ability to establish and close out positions in exchange-traded options depends on the existence of a liquid market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counter-party or by a transaction in the secondary market if any such market exists. There can be no assurance that the Fund will in fact be able to close out an OTC option position at a favorable price prior to expiration. In the event of insolvency of the counter-party, the Fund might be unable to close out an OTC option position at any time prior to its expiration.

If the Fund were unable to effect a closing transaction for an option it had purchased, it would have to exercise the option to realize any profit. The inability to enter into a closing purchase transaction for a covered call option written by the Fund could cause material losses because the Fund would be unable to sell the investment used as cover for the written option until the option expires or is exercised.

Options on Indices

An index fluctuates with changes in the market values of the securities included in the index. Options on indices give the holder the right to receive an amount of cash upon exercise of the option. Receipt of this cash amount will depend upon the closing level of the index upon which the option is based being greater than (in the case of a call) or less than (in the case of put) the exercise price of the option. Some stock index options are based on a broad market index such as the S&P 500[®] Index, the NYSE Composite Index or the NYSE Arca Index or on a narrower index such as the Philadelphia Stock Exchange Over-the-Counter Index.

Each of the exchanges has established limitations governing the maximum number of call or put options on the same index that may be bought or written by a single investor, whether acting alone or in concert with others (regardless of whether such options are written on the same or different exchanges or are held or written on one or more accounts or through one or more brokers). Under these limitations, option positions of all investment companies advised by the Adviser are combined for purposes of these limits. Pursuant to these limitations, an exchange may order the liquidation of positions and may impose other sanctions or restrictions. These position limits may restrict the number of listed options that the Fund may buy or sell.

Puts and calls on indices are similar to puts and calls on securities or futures contracts except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities or futures contracts. When the Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple ("multiplier"), which determines the total value for each point of such difference. When the Fund buys a call on an index, it pays a premium and has the same rights to such call as are indicated above. When the Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund's exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When the Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and the exercise price times the multiplier if the closing level is less than the exercise price.

Risks of Options on Indices

If the Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, the Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

OTC Options

Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows the Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

Futures Contracts and Options on Futures Contracts

A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security on the expiration date of the contract. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount times the difference between the value of a specific index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made.

When the Fund writes an option on a futures contract, it becomes obligated, in return for the premium paid, to assume a position in the futures contract at a specified exercise price at any time during the term of the option. If the Fund writes a call, it assumes a short futures position. If it writes a put, it assumes a long futures position.

When the Fund purchases an option on a futures contract, it acquires the right in return for the premium it pays to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put).

Whether the Fund realizes a gain or loss from futures activities depends upon movements in the underlying security or index. The extent of the Fund's loss from an unhedged short position in futures contracts or from writing unhedged call options on futures contracts is potentially unlimited. The Fund only purchases and sells futures contracts and options on futures contracts that are traded on a U.S. exchange or board of trade.

No price is paid upon entering into a futures contract. Instead, at the inception of a futures contract the Fund is required to deposit "initial margin" in an amount generally equal to 10% or less of the contract value. Margin also must be deposited when writing a call or put option on a futures contract, in accordance with applicable exchange rules. Unlike margin in securities transactions, initial margin does not represent a borrowing, but rather is in the nature of a performance bond or good-faith deposit that is returned to the Fund at the termination of the transaction if all contractual obligations have been satisfied. Under certain circumstances, such as periods of high volatility, the Fund may be required by an exchange to increase the level of its initial margin payment, and initial margin requirements might be increased generally in the future by regulatory action.

Subsequent "variation margin" payments are made to and from the futures commission merchant daily as the value of the futures position varies, a process known as "marking-to-market." Variation margin does not involve borrowing, but rather represents a daily settlement of the Fund's obligations to or from a futures commission merchant. When the Fund purchases an option on a futures contract, the premium paid plus transaction costs is all that is at risk. In contrast, when the Fund purchases or sells a futures contract or writes a call or put option thereon, it is subject to daily variation margin calls that could be substantial in the event of adverse price movements. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Purchasers and sellers of futures contracts and options on futures can enter into offsetting closing transactions, similar to closing transactions in options, by selling or purchasing, respectively, an instrument identical to the instrument purchased or sold. Positions in futures and options on futures contracts may be closed only on an exchange or board of trade that provides a secondary market. However, there can be no assurance that a liquid secondary market will exist for a particular contract at a particular time. In such event, it may not be possible to close a futures contract or options position.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or an option on a futures contract can vary from the previous day's settlement price. Once that limit is reached, no trades may be made that day at a price beyond the limit. Daily price limits do not limit potential losses because prices could move to the daily limit for several consecutive days with little or no trading, thereby preventing liquidation of unfavorable positions.

If the Fund was unable to liquidate a futures contract or an option on a futures position due to the absence of a liquid secondary market or the imposition of price limits, it could incur substantial losses. The Fund would continue to be subject to market risk with respect to the position. In addition, except in the case of purchased options, the Fund would continue to be required to make daily variation margin payments and might be required to maintain cash or liquid assets in an account.

Risks of Futures Contracts and Options Thereon

The ordinary spreads between prices in the cash and futures markets (including the options on futures markets), due to differences in the natures of those markets, are subject to the following factors, which may create distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements.

Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationships between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

Combined Positions

The Fund may purchase and write options in combination with each other. For example, the Fund may purchase a put option and write a call option on the same underlying instrument in order to construct a combined position whose risk and return characteristics are similar to selling a futures contract. Another possible combined position would involve writing a call option at one strike price and buying a call option at a lower price, in order to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Commodity Pool Operator Exclusion

The Adviser currently intends to operate the Fund in compliance with the requirements of Rule 4.5 of the CFTC regulations under the Commodity Exchange Act (the "CEA"). As a result, the Fund is not deemed to be a "commodity pool" under the CEA and will be limited in its ability to use futures and options on futures or commodities or engage in swap transactions for other than bona fide hedging purposes. Provided the Fund operates within the limits of Rule 4.5, the Adviser will be excluded from registration with and regulation under the CEA, and the Adviser will not be deemed to be a "commodity pool operator" with respect to the operations of the Fund. If the Fund were no longer able to claim the exclusion, that Fund and the Adviser, to the extent trading in commodity interests, would be subject to regulation under the CEA.

To the extent the Adviser can no longer rely on the Rule 4.5 exclusion, the impact on the Fund of CFTC requirements is uncertain. CFTC-mandated disclosure, reporting and recordkeeping obligations, which have been "harmonized" with the overlapping SEC obligations, will apply with respect to the Fund. The effects of these regulatory changes could reduce investment returns or limit the Fund's ability to implement its investment strategy.

Investors in the Fund and their financial advisers should consider whether the Fund's potential status as a "commodity pool" impacts their operations or status under the CEA in deciding whether to invest in the Fund.

Swap Agreements

The Fund may enter into swap agreements. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of

return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are calculated with respect to a “notional amount,” *i.e.*, the return on or increase in value of a particular dollar amount invested in a “basket” of securities representing a particular index.

Most swap agreements entered into by the Fund calculate the obligations of the parties to the agreement on a “net basis.” Consequently, the Fund’s current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”). Payments may be made at the conclusion of a swap agreement or periodically during its term.

Swap agreements do not involve the delivery of securities or other underlying assets.

Accordingly, if a swap is entered into on a net basis, if the other party to a swap agreement defaults, the Fund’s risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive, if any.

The net amount of the excess, if any, of the Fund’s obligations over its entitlements with respect to a swap agreement entered into on a net basis will be accrued daily and an amount of cash or liquid asset having an aggregate net asset value (“NAV”) at least equal to the accrued excess will be maintained in an account with the Fund’s custodian that satisfies the 1940 Act. The Fund will also establish and maintain such accounts with respect to its total obligations under any swaps that are not entered into on a net basis.

Obligations under swap agreements so covered will not be construed to be “senior securities” for purposes of the Fund’s investment restriction concerning senior securities.

Because they are two-party contracts and may have terms of greater than seven days, swap agreements may be considered to be illiquid for the Fund’s illiquid investment limitations. The Fund will not enter into any swap agreement unless the Adviser believes that the other party to the transaction is creditworthy. The Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty.

The Fund may enter into a swap agreement in circumstances where the Adviser believes that it may be more cost effective or practical than buying the underlying securities or a futures contract or an option on such securities. The counterparty to any swap agreement will typically be a bank, investment banking firm or broker/dealer. The counterparty will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular stocks represented in the index, plus the dividends that would have been received on those stocks. The Fund will agree to pay to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to the Fund on any swap agreement should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap

documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments that are traded in the OTC market. The Adviser, under the supervision of the Board, is responsible for determining and monitoring the liquidity of Fund transactions in swap agreements.

Real Estate Investment Trusts (“REITs”)

REITs invest primarily in real property and earn rental income from leasing those properties. They also may realize gains or losses from the sale of properties. REITs generally exercise some degree of control over the operational aspects of their real estate investments, lease terms and property maintenance and repair.

Mortgage REITs invest primarily in mortgages and similar real estate interests and receive interest payments from the owners of the mortgaged properties and are paid interest by the owners of the financed properties. Hybrid REITs invest both in real property and in mortgages.

A REIT generally is not taxed on income distributed to its shareholders if it complies with certain federal income tax requirements relating primarily to its organization, ownership, assets and income and, further, if it distributes substantially all of its taxable income to shareholders each year. Consequently, REITs tend to focus on income-producing real estate investments.

The Fund’s investments in REITs may be adversely affected by deteriorations of the real estate rental market, in the case of REITs that primarily own real estate, or by deteriorations in the creditworthiness of property owners and changes in interest rates in the case of REITs that primarily hold mortgages. REITs also are dependent upon specialized management skills, may not be diversified in their holdings and are subject to the risks of financing projects. REITs also may be subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. Under certain circumstances, an entity may fail to qualify for the special tax treatment available to REITs, which would subject the entity to federal income taxes and adversely affect the value of its securities.

In general, qualified REIT dividends that an investor receives directly from a REIT are automatically eligible for the 20% qualified business income deduction. The IRS has issued final Treasury Regulations that permit a dividend or part of a dividend paid by a RIC and reported as a “section 199A dividend” to be treated by the recipient as a qualified REIT dividend for purposes of the 20% qualified business income deduction, if certain holding period and other requirements have been satisfied by the recipient with respect to its Fund shares.

When-Issued Securities

When-issued securities transactions involve a commitment by the Fund to purchase or sell particular securities with payment and delivery taking place at a future date, and permit the Fund to lock in a price or yield on a security it owns or intends to purchase, regardless of future changes in interest rates or market action. No income accrues to the purchaser of a security on a when-issued basis prior to delivery. Such securities are recorded as an asset and are subject to changes in value based upon changes in the general level of interest rates. Purchasing a security on a when-issued basis can involve a risk that the market price at the time of delivery may be lower than the agreed-upon purchase price, in which case there could be an unrealized loss at the time of delivery. The Fund will only make commitments to purchase securities on a when-issued basis with the intention of actually acquiring the securities, but may sell them before the settlement date if it is deemed advisable. The Fund will establish in a segregated account, or earmark as segregated on the books

of the Fund or the Fund's custodian, an amount of liquid assets equal to 102% of the amount of its commitment to purchase securities on a when-issued basis.

These assets will be marked-to-market daily, and the Fund will increase the aggregate value of the assets, as necessary, to ensure that the assets are at least equal to 102% of the amount of the Fund's commitments.

Private Placements and Restricted Securities

The Fund may invest in restricted securities that are illiquid at the time of purchase. While these holdings may offer more potential for growth, they may present a higher degree of business and financial risk, which can result in substantial losses. The Fund may have difficulty valuing these holdings and may be unable to sell these holdings at the time or price desired.

Restricted securities include securities acquired from the issuer in "private placement" transactions. Private placement securities are not registered under the Securities Act, and are subject to restrictions on resale. They are eligible for sale only to certain qualified institutional buyers, like the Fund, and are not sold on a trading market or exchange. While private placement securities offer attractive investment opportunities otherwise not available on an open market, because such securities are available to few buyers, they are often both difficult to sell and to value. Certain of the Fund's investments may be placed in smaller, less seasoned, issuers that present a greater risk due to limited product lines and/or financial resources. The issuer of privately placed securities may not be subject to the disclosure and other investor protection requirements of a public trade. Additionally, the Fund could obtain material non-public information from the issuer of such securities that would restrict the Fund's ability to conduct portfolio transactions.

Privately placed securities can usually only be resold to other qualified institutional buyers, or in a private transaction, or to a limited number of purchasers, or in a limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration. The Fund may incur more cost in the disposition of such securities because of the time and legal expense required to negotiate a private placement. Because of the limited market, the Fund may find it difficult to sell the securities when it finds it advisable to do so and, to the extent such securities are sold in private negotiations, they may be sold for less than the price for which they were purchased or than their fair market value.

Privately placed securities cannot be resold to the public unless they have been registered under the Securities Act or pursuant to an exemption, such as Rule 144A. Such securities are commonly known as "144A securities" and may only be resold under certain circumstances to other institutional buyers. 144A securities frequently trade in an active secondary market. As a result of the resale restrictions on 144A securities, there is a greater risk that they will become illiquid than securities registered with the SEC. Although securities which may be resold only to "qualified institutional buyers" in accordance with the provisions of Rule 144A under the Securities Act are technically considered "restricted securities," the Fund may purchase Rule 144A securities without regard to the limitation on investments in illiquid securities described in the "Illiquid Securities" section, provided that a determination is made that such securities are not determined to be illiquid under the liquidity risk management programs of the Trust and the Adviser applicable to the Fund. The Fund may also purchase certain commercial paper issued in reliance on the exemption from registration in Section 4(a)(2) of the Securities Act ("4(a)(2) Paper"). Section 4(2) commercial paper is a short-term debt instrument issued by a corporation to institutional and other accredited investors in a transaction or series of transactions exempt from registration pursuant to Section 4(2)

of the 1933 Act. The Adviser will determine the liquidity of Rule 144A securities and 4(a)(2) Paper under the supervision of the Board of Trustees. The liquidity of Rule 144A securities and 4(a)(2) Paper will be monitored by the Adviser, and if as a result of changed conditions it is determined that a Rule 144A security or 4(a)(2) Paper is no longer liquid, the Fund's holdings of illiquid securities will be reviewed to determine what, if any, action is required to assure that the Fund does not exceed its applicable percentage limitation for investments in illiquid securities. Please refer to the "Illiquid Securities" section for further discussion of regulatory considerations and constraints relating to investment liquidity.

Other Investment Companies

The Fund may invest in other investment companies, including exchange traded funds ("ETFs") and money market funds. The Fund may rely on Rule 12d1-4 of the 1940 Act, which provides an exemption from Section 12(d)(1) that allows the Fund to invest all of its assets in other registered funds, including ETFs, if the Fund satisfies certain conditions specified in the Rule, including, among other conditions, that the Fund and its advisory group will not control (individually or in the aggregate) an acquired fund (e.g., hold more than 25% of the outstanding voting securities of an acquired fund that is a registered open-end management investment company).

The Fund may also rely on Section 12(d)(1)(F) of the 1940 Act with respect to its investments in other investment companies. The Fund's investments in money market mutual funds may be used for cash management purposes and to maintain liquidity in order to satisfy redemption requests or pay unanticipated expenses. Section 12(d)(1) of the 1940 Act precludes the Fund from acquiring (i) more than 3% of the total outstanding shares of another investment company; (ii) shares of another investment company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) shares of another registered investment company and all other investment companies having an aggregate value in excess of 10% of the value of the total assets of the Fund. However, Section 12(d)(1)(F) of the 1940 Act provides that the provisions of paragraph 12(d) shall not apply to securities purchased or otherwise acquired by the Fund if: (i) immediately after such purchase or acquisition not more than 3% of the total outstanding shares of such investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund has not offered or sold, and is not proposing to offer or sell its shares through a principal underwriter or otherwise at a public or offering price that includes a sales load of more than 1 1/2%.

When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's operating expenses, including the potential duplication of management fees. The risk of owning another investment company generally reflects the risks of owning the underlying investments the other investment company holds. The Fund also will incur brokerage costs when it purchases and sells investment company shares. ETFs may trade at a discount or premium to NAV. There can be no assurance that an active trading market for an ETF's shares will exist. There are greater risks involved in investing in securities with limited market liquidity.

ETFs

Each share of an ETF represents an undivided ownership interest in the portfolio of securities held by that ETF. An ETF is an investment company that offers investors a proportionate share in a portfolio of stocks, bonds, commodities, currencies or other securities. Like individual equity securities, ETFs are traded on a stock exchange and can be bought and sold throughout the day.

Passive ETFs attempt to achieve the same investment return as that of a particular market index. To mirror the performance of a market index, an ETF invests either in all of the securities in a particular index in the same proportion that is represented in the index itself or in a representative sample of securities in a particular index in a proportion meant to track the performance of the entire index. Such ETFs generally do not buy or sell securities, except to the extent necessary to conform their portfolios to the corresponding index. Because such ETFs have operating expenses and transaction costs, while a market index does not, they typically will be unable to match the performance of the index exactly. Alternatively, some ETFs use active investment strategies instead of tracking broad market indices and, as a result, may incur greater operating expenses and transactions costs than traditional ETFs. Investments in ETFs are investments in other investment companies. (See “Other Investment Companies,” above.)

ETFs generally do not sell or redeem their shares for cash, and most investors do not purchase or redeem shares directly from an ETF at all. Instead, the ETF issues and redeems its shares in large blocks called “creation units.” Creation units are issued to anyone who deposits a specified portfolio of the ETF’s underlying securities, as well as a cash payment generally equal to accumulated dividends on the securities (net of expenses) up to the time of deposit, and creation units are redeemed in kind for a portfolio of the underlying securities (based on the ETF’s NAV) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Most ETF investors, however, purchase and sell ETF shares in the secondary trading market on a securities exchange, in lots of any size, at any time during the trading day. ETF investors generally must pay a brokerage fee for each purchase or sale of ETF shares, including purchases made to reinvest dividends.

Because ETF shares are created from the securities of an underlying portfolio and can be redeemed into the securities of an underlying portfolio on any day, arbitrage traders may move to profit from any discrepancies between the market price of the ETF’s shares in the secondary market and the NAV per share of the ETF’s portfolio, which helps to close the price gap between the two. Of course, because of the forces of supply and demand and other market factors, there may be times when an ETF share trades at a premium or discount to its NAV.

The Fund will invest in ETF shares only if the ETF is registered as an investment company under the 1940 Act (see “Other Investment Companies,” above). If an ETF in which the Fund invests ceases to be a registered investment company, the Fund will dispose of the securities of the ETF as soon as practicable while trying to maximize the return to the Fund’s shareholders.

Furthermore, in connection with its investment in ETF shares, the Fund will incur various costs. The Fund may also realize capital gains when ETF shares are sold, and the purchase and sale of the ETF shares may include a brokerage commission that may result in costs. In addition, the Fund is subject to other fees as an investor in ETFs. Generally, those fees include, but are not limited to, director/trustee fees, operating expenses, licensing fees, registration fees and marketing expenses, each of which will be reflected in the NAV of ETFs and therefore the shares representing a beneficial interest therein.

There is a risk that the underlying ETFs in which the Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund may invest are each granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may

terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire NAV falls below a certain amount.

Equity Securities

The Fund may invest in equity securities, including common and preferred stock, as a non-principal investment strategy. An equity security (such as a stock, partnership interest or other beneficial interest in an issuer) represents a proportionate share of the ownership of a company. The value of an equity security is based on the success of the company's business, any income paid to stockholders, the value of its assets and general market conditions. Common stocks and preferred stocks are examples of equity securities. Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets.

Some preferred stocks may be convertible into common stock. More information regarding common stock and preferred stock is included below.

Common Stock

A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as holders of common stock and it is possible that all assets of that company will be exhausted before any payments are made to the Fund.

Preferred Stocks

Preferred stocks pay fixed or floating dividends to investors and have "preference" over common stock in the payment of dividends and the liquidation of an issuer's assets. This means that an issuer must pay dividends on preferred stocks before paying any dividends on its common stock. Some preferred stocks offer a fixed rate of return with no maturity date. Because those preferred stocks never mature, they trade like long-term bonds, can be more volatile than other types of preferred stocks and may have heightened sensitivity to changes in interest rates. Other preferred stocks have variable dividends, generally determined on a quarterly or other periodic basis, either according to a formula based upon a specified premium or discount to the yield on particular U.S. Treasury securities or based on an auction process involving bids submitted by holders and prospective purchasers of such securities.

Because preferred stocks represent equity ownership interest in an issuer, their value usually will react more strongly than bonds and other debt instruments to actual or perceived changes in an issuer's financial condition or prospects or to fluctuations in the equity markets. Preferred stockholders usually have no voting rights or their voting rights are limited to certain extraordinary transactions or events.

Temporary Strategies; Cash or Similar Investments

For temporary defensive purposes, the Adviser may invest up to 100% of the Fund's total assets in high-quality, short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. Taking a temporary defensive position may result in the Fund not achieving its

investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' management fees and operational expenses.

For longer periods of time, the Fund may hold a substantial cash position. If the market advances during periods when the Fund is holding a large cash position, the Fund may not participate to the extent it would have if the Fund had been more fully invested, and this may result in the Fund not achieving its investment objective during that period. To the extent that the Fund uses a money market fund for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses.

The Fund may invest in any of the following securities and instruments:

Money Market Mutual Funds

The Fund may invest in money market mutual funds in connection with its management of daily cash positions or as a temporary defensive measure. Generally, money market mutual funds seek to earn income consistent with the preservation of capital and maintenance of liquidity. They primarily invest in high quality money market obligations, including securities issued or guaranteed by the U.S. Government or its agencies and instrumentalities, bank obligations and high-grade corporate instruments. These investments generally mature within 397 days from the date of purchase. An investment in a money market mutual fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency. The Fund's investments in money market mutual funds may be used for cash management purposes and to maintain liquidity in order to satisfy redemption requests or pay unanticipated expenses.

Your cost of investing in the Fund will generally be higher than the cost of investing directly in the underlying money market mutual fund shares. You will indirectly bear fees and expenses charged by the underlying money market mutual funds in addition to the Fund's direct fees and expenses. Furthermore, the use of this strategy could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes payable by you.

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits

The Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar-denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions.

General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under the investment objective and policies stated above and in the Prospectus, the Fund may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations

The Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations

The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by Standard & Poor's Rating Services ("S&P"), "Prime-1" or "Prime-2" by Moody's Investor Services, Inc. ("Moody's"), or similarly rated by another nationally recognized statistical ratings organization ("NRSRO") or, if unrated, will be determined by the Adviser to be of comparable quality.

Corporate obligations include bonds and notes issued by corporations to finance longer-term credit needs than would otherwise be supported by commercial paper. While such obligations generally have maturities of ten years or more, the Fund may purchase corporate obligations which have remaining maturities of one year or less from the date of purchase and which are rated "A" or higher by S&P or "A" or higher by Moody's.

Borrowing

The Fund may borrow money for investment purposes, which is a form of leveraging, to the extent permitted by the 1940 Act. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk while increasing investment opportunity. Leverage will magnify changes in the Fund's net asset value and on the Fund's investments. Although the principal of such borrowings will be fixed, the Fund's assets may change in value during the time the borrowing is outstanding. Leverage also creates interest expenses for the Fund. To the extent the income derived from securities purchased with borrowed funds exceeds the interest the Fund will have to pay, the Fund's net income will be greater than it would be if leverage were not used. Conversely, if the income from the assets obtained with borrowed funds is not sufficient to cover the cost of leveraging, the net income of the Fund will be less than it would be if

leverage were not used, and therefore the amount available for distribution to shareholders as dividends will be reduced. The use of derivatives in connection with leverage creates the potential for significant loss.

The Fund may also borrow funds to meet redemptions or for other emergency purposes. Such borrowings may be on a secured or unsecured basis at fixed or variable rates of interest. The 1940 Act precludes the Fund from borrowing if, as a result of such borrowing, the total amount of all money borrowed by the Fund exceeds 33 1/3% of the value of its total assets (that is, total assets including borrowings, less liabilities exclusive of borrowings) at the time of such borrowings. This means that the 1940 Act requires the Fund to maintain continuous asset coverage of not less than 300% with respect to all borrowings. If such asset coverage should decline to less than 300% due to market fluctuations or other reasons, the Fund may be required to dispose of some of its portfolio holdings within three days in order to reduce the Fund's debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to dispose of assets at that time.

The Fund also may be required to maintain minimum average balances in connection with such borrowing or to pay a commitment or other fee to maintain a line of credit. Either of these requirements would increase the cost of borrowing over the stated interest rate.

Borrowing by the Fund creates an opportunity for increased net income, but at the same time, creates special risk considerations. For example, leveraging may exaggerate the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio.

Illiquid Securities

In accordance with Rule 22e-4 (the "Liquidity Rule") under the 1940 Act, the Fund may invest up to 15% of its net assets in "illiquid investments" that are assets. For these purposes, "illiquid investments" are investments that cannot reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Under the supervision of the Board, the Adviser determines the liquidity of the Fund's investment subject to guidelines as set forth in the Fund's liquidity risk management program.

Each portfolio investment must be classified at least monthly into one of four liquidity categories (highly liquid, moderately liquid, less liquid and illiquid), which are defined pursuant to the Liquidity Rule. Such classification is to be made using information obtained after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. Moreover, in making such classification determinations, the Fund determines whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund takes this determination into account when classifying the liquidity of that investment. The Fund may be assisted in classification determinations by one or more third-party service providers. Assets classified according to this process as "illiquid investments" are those subject to the 15% limit on illiquid investments.

Cybersecurity

With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to,

gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund’s ability to calculate its net asset value (“NAV”), impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Similar adverse consequences could result from cyber incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and service providers for shareholders) and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future.

Investment Restrictions

Fundamental Investment Restrictions

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the affirmative vote of the holders of a “majority of the outstanding voting securities” of the Fund. Under the 1940 Act, the vote of the holders of a “majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. issue senior securities or borrow money, except that (i) the Fund may borrow from banks in amounts not exceeding one-third (33 1/3%) of its total assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales in accordance with its objectives and strategies;
2. underwrite the securities of other issuers (except that the Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities under circumstances where it may be considered to be an underwriter under the Securities Act);
3. purchase or sell real estate or interests in real estate, unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities which are secured by real estate and securities of companies that invest or deal in real estate);
4. purchase or sell commodities or commodities contracts, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by commodities;

5. make loans, except as permitted by the 1940 Act and as described in the Prospectus and this SAI;
6. with respect to 75% of its total assets, purchase the securities of any one issuer if, immediately after and as a result of such purchase, (a) the value of the Fund's holdings in the securities of such issuer exceeds 5% of the value of the Fund's total assets, or (b) the Fund owns more than 10% of the outstanding voting securities of the issuer (this restriction does not apply to investments in the securities of the U.S. Government, or its agencies or instrumentalities, or other investment companies); or
7. invest in the securities of any one industry or group of industries if, as a result, 25% or more of the Fund's total assets would be invested in the securities of such industry or group of industries, except that the foregoing does not apply to the Fund's investments in (a) municipal securities, excluding industrial development bonds; or (b) securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or securities of other investment companies⁽¹⁾.

⁽¹⁾ For purposes of complying with this restriction, municipal securities where payment of principal and interest are primarily derived from the assets and revenues of non-governmental entities are excluded from the definition of municipal securities. In determining its compliance with the fundamental investment restriction on concentration, the Fund will consider the underlying holdings, where easily determined, of investment companies in which the Fund is invested.

In determining its compliance with the fundamental investment restriction on concentration, the Fund will look through to the underlying holdings of any affiliated investment company and will consider their entire investment in any investment company with a policy to concentrate, or having otherwise disclosed that it is concentrated, in a particular industry or group of related industries as being invested in such industry or group of related industries. In determining its compliance with the fundamental investment restriction on concentration, the Fund will also look through to the user or use of private activity municipal bonds to determine their industry.

Except with respect to the limitation on borrowing and illiquid investments, if the Fund is in compliance with a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus at the time that a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

Non-Fundamental Investment Restriction

The following non-fundamental investment restriction is applicable to the Fund. This restriction can be changed by the Board of Trustees, but the change will only be effective after notice is given to shareholders of the Fund.

The Fund may not:

1. make any change in its investment policy of investing at least 80% of net assets in investments suggested by the Fund's name without first changing the Fund's name and providing shareholders with at least 60 days' prior written notice.

Exchange Listing and Trading

Shares are listed for trading and trade throughout the day on the Exchange.

There can be no assurance that the Fund will continue to meet the requirements of the Exchange necessary to maintain the listing of Shares. The Exchange may, but is not required to, remove Shares from the listing under any of the following circumstances: (i) the Exchange becomes aware that the Fund is no longer eligible to operate in reliance on Rule 6c-11 of the 1940 Act; (ii) the Fund no longer complies with the Exchange's requirements for Shares; or (iii) such other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove Shares of the Fund from listing and trading upon termination of the Fund.

The Trust reserves the right to adjust the price levels of Shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

Management of the Fund

Board of Trustees

The management and affairs of the Fund are supervised by the Board of Trustees. The Board of Trustees consists of seven individuals. The Trustees are fiduciaries for the Fund's shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Fund.

Trustees and Officers

The Trustees and the officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in the Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
<i>Independent Trustees</i>					
Michael D. Akers, Ph.D. 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1955	Trustee	Indefinite Term; Since August 22, 2001	31	Professor Emeritus, Department of Accounting (June 2019-present), Professor, Department of Accounting (2004-2019), Marquette University.	Independent Trustee, USA MUTUALS (an open-end investment company) (2001-2021).
Gary A. Drska 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1956	Trustee	Indefinite Term; Since August 22, 2001	31	Retired; Former Pilot, Frontier/ Midwest Airlines, Inc. (airline company) (1986-2021).	Independent Trustee, USA MUTUALS (an open-end investment company) (2001-2021).

N/A

*Mr. Buckel is deemed to be an “interested person” of the Trust as defined by the 1940 Act due to his position and material business relationship with the Trust.

Role of the Board

The Board of Trustees provides oversight of the management and operations of the Trust. Like all funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser, Distributor, Custodian, and the Fund’s administrator and transfer agent, each of which are discussed in greater detail in this SAI. The Board approves all significant agreements with the Adviser, Distributor, Custodian, and the Fund’s administrator and transfer agent. The Board has appointed various individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust’s operations. The Board has appointed a Chief Compliance Officer (“CCO”) who reports directly to the Board and who administers the Trust’s compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal Board meetings, which are generally held five times per year, and at such other times as the Board determines is necessary, and involve the Board’s review of recent Trust operations. From time to time, one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board meetings, to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust’s investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to perform its oversight function effectively. The Board is composed of six Independent Trustees – Dr. Michael D. Akers, Gary A.

Drska, Vincent P. Lyles, Erik K. Olstein, Lisa Zúñiga Ramírez and Gregory M. Wesley – and one Trustee who is an “interested person” (as defined by the 1940 Act) of the Trust (the “Interested Trustee”) – John P. Buckel. Accordingly, more than 85% of the members of the Board are Independent Trustees, Trustees who are not affiliated with the Adviser or its affiliates, or any other investment adviser or service provider to the Trust or any underlying fund. The Board of Trustees has established two standing committees, an Audit Committee and a Nominating Committee, which are discussed in greater detail under “Board Committees” below. Each of the Audit Committee and the Nominating Committee is composed entirely of Independent Trustees. The Independent Trustees have engaged their own independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Trust’s Chairperson, Mr. Buckel, is deemed to be an “interested person” of the Trust, as defined by the 1940 Act, due to his position and material business relationship with the Trust. Mr. Buckel also serves as a Vice President of U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”), the Fund’s administrator. The Trust has not appointed a lead Independent Trustee.

In accordance with the fund governance standards prescribed under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his or her experience, qualifications, attributes and skills as set forth in the subsection “Trustee Qualifications” below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including the unaffiliated nature of each investment adviser and the funds managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust’s underlying funds.

The Board has determined that the function and composition of the Audit Committee and the Nominating Committee are appropriate to address any potential conflicts of interest that may arise from the Chairperson’s status as an Interested Trustee. In addition, the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating Committee allows these Trustees to participate in the full range of the Board’s oversight duties, including oversight of risk management processes discussed below. Given the specific characteristics and circumstances of the Trust as described above, the Trust has determined that the Board’s leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust’s service providers. Because risk management is a broad concept composed of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the CCO regularly reports to the Board during Board meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. In addition, the Independent Trustee designated as the Audit Committee’s “audit committee financial expert” meets with the Treasurer

and the Fund's independent registered public accounting firm to discuss, among other things, the internal control structure of the Trust's financial reporting function. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks as well as other risks that may be discussed during Audit Committee meetings.

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to his or her continued service as a Trustee of the Trust in light of the Trust's business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees' qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

Michael D. Akers, Ph.D., CPA. Dr. Akers has served as an Independent Trustee of the Trust since 2001. Dr. Akers previously served as an independent trustee of USA Mutuals, an open-end investment company, from 2001 to June 2021. Dr. Akers has been a Professor Emeritus, Department of Accounting at Marquette University since June 2019, was Professor, Department of Accounting at Marquette University from 2004 to May 2019, was Chair of the Department of Accounting at Marquette University from 2004 to 2017, and was Associate Professor, Department of Accounting at Marquette University from 1996 to 2004. Dr. Akers is a certified public accountant, a certified fraud examiner, a certified internal auditor and a certified management accountant. Through his experience as an investment company trustee and his employment experience, Dr. Akers is experienced with financial, accounting, regulatory and investment matters.

Gary A. Drska. Mr. Drska has served as an Independent Trustee of the Trust since 2001. Mr. Drska previously served as an independent trustee of USA Mutuals from 2001 to June 2021. Mr. Drska previously served as a Pilot of Frontier/Midwest Airlines, Inc., an airline company, from 1986 to September 2021. Through his experience as an investment company trustee, Mr. Drska is experienced with financial, accounting, regulatory and investment matters.

Vincent P. Lyles. Mr. Lyles has served as an Independent Trustee of the Trust since 2022. Mr. Lyles has served as Executive Director of Milwaukee Succeeds since January 2023. He previously served as System Vice President of Community Relations at Advocate Aurora Health Care from 2019 to 2022. He served as an Independent Director of BMO Funds, Inc., an open-end investment company, from 2017 to 2022. Mr. Lyles is a board member and finance committee member of Badger Mutual Insurance Company and a Trustee and member of the Committee of Student Experience & Mission on the Board of Trustees at Marquette University. Mr. Lyles previously served as President and Chief Executive Officer of the Boys & Girls Club of Greater Milwaukee from 2012

to 2018, President of M&I Community Development Corporation from 2006 to 2011, and as a Director of Public Finance of Robert W. Baird & Co. from 1995 to 2006. He received his Juris Doctor degree from the University of Wisconsin-Madison Law School in 1987. Through his experience as an investment company trustee and his employment experience, Mr. Lyles is experienced with legal, financial, accounting, regulatory and investment matters.

Erik K. Olstein. Mr. Olstein has served as an Independent Trustee of the Trust since 2022. Mr. Olstein served as President and Chief Operating Officer from 2000 to 2020 and Vice President of Sales and Chief Operating Officer from 1995 to 2000 at Olstein Capital Management, L.P., an asset management firm he co-founded. During his time at Olstein Capital Management, L.P., Mr. Olstein was responsible for fiduciary oversight and management of The Olstein Funds, an open-end investment company, where he served as Trustee, Secretary and Assistant Treasurer from 1995 to 2018. Mr. Olstein currently serves as President and Trustee of the Board of Trustees of the Trinity-Pawling School and has previously held Board positions with the American Friends of the National Museum of the Royal Navy, National Maritime Historical Society and U.S. Naval Service Personal Education Assistance Fund. Through his experience as an investment company trustee and his employment experience, Mr. Olstein is experienced with financial, accounting, regulatory and investment matters.

Lisa Zúñiga Ramírez, CFA[®], FSA. Ms. Ramírez has served as an Independent Trustee of the Trust since 2022. Ms. Ramírez has served on the Board of Directors of Peoples Financial Services Corp., a publicly-traded bank holding company, since 2022. Ms. Ramírez served as Senior Portfolio Manager at Segall Bryant & Hamill, LLC, an asset management firm, from 2018 to 2020. She served as Partner and Senior Portfolio Manager from 2009 to 2018, Partner and Senior Equity Analyst from 2002 to 2009 and Equity Analyst from 1997 to 2002 at Denver Investments, LLC, an asset management firm that was acquired by Segall Bryant & Hamill, LLC in 2018. Ms. Ramírez currently serves as an Independent Director on the Bow River Capital Advisory Board, an asset management firm, and is a Director of the Denver Employees Retirement Plan. In addition, she serves on the boards of The Denver Foundation, NACD (National Association of Corporate Directors) Colorado Chapter, Latinas First Foundation and Vuela for Health. Ms. Ramírez is a CFA[®] charterholder (CFA[®] is a registered trademark owned by the CFA Institute) and holds the Fundamentals of Sustainability Accounting (FSA) credential from the Sustainability Accounting Standards Board. Through her employment experience, Ms. Ramírez is experienced with financial, accounting, ESG (environmental, social and governance), regulatory and investment matters.

Gregory M. Wesley. Mr. Wesley has served as an Independent Trustee of the Trust since 2022. Mr. Wesley has served as Senior Vice President of Strategic Alliances and Business Development at the Medical College of Wisconsin since 2016. Prior to his current role at the Medical College of Wisconsin, he was a Partner at MWH Law Group LLP, a law firm during 2016, and a Partner at Gonzalez, Saggio & Harlan LLP, a law firm from 2002 to 2016. Mr. Wesley serves on the Board of Directors of the Metropolitan Milwaukee Association of Commerce, MHS Health Wisconsin, Versiti, Inc., and the Greater Milwaukee Committee. He also serves on the Board of Trustees of the Johnson Foundation at Wingspread and the Greater Milwaukee Foundation. He previously sat on the Board of Trustees of the Medical College of Wisconsin from 2009 to 2016 and the Board of Directors of Park Bank Milwaukee from 2015 to 2020. Mr. Wesley received his Juris Doctor degree from the University of Wisconsin-Madison Law School in 1997. Through his sustained employment and board experience, Mr. Wesley is experienced with legal, financial, accounting, regulatory and investment matters.

John P. Buckel. Mr. Buckel has served as a Trustee of the Trust since 2023 and has served as President of the Trust since 2013. Mr. Buckel has served as a Vice President of Fund Services, a multi-line service provider to investment companies, since 2004. Through his experience as an investment company trustee and his employment experience, Mr. Buckel is experienced with financial, accounting, regulatory and investment matters.

Trustee Ownership of Shares

As of the date of this SAI, no Trustee or officer of the Trust beneficially owned shares of the Fund or any other series of the Trust.

Furthermore, as of the date of this SAI, neither the Trustees who are not “interested” persons of the Fund, nor members of their immediate families, owned securities beneficially, or of record, in the Adviser, the Distributor or any of their affiliates. Accordingly, neither the Trustees who are not “interested” persons of the Fund nor members of their immediate families, have a direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have had a direct or indirect interest, the value of which exceeds \$120,000 in (i) the Adviser, the Distributor or any of their affiliates, or (ii) any transaction or relationship in which such entity, the Fund, any officer of the Trust, or any of their affiliates was a party.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska, Mr. Vincent P. Lyles, Mr. Erik K. Olstein, Ms. Lisa Zúñiga Ramírez and Mr. Gregory M. Wesley. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund’s independent auditor concerning the scope of the audit and the auditor’s independence. Dr. Akers is designated as the Audit Committee chairman and serves as the Audit Committee’s “audit committee financial expert,” as stated in the annual reports relating to the series of the Trust.

Nominating Committee. The Trust has a Nominating Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska, Mr. Vincent P. Lyles, Mr. Erik K. Olstein, Ms. Lisa Zúñiga Ramírez and Mr. Gregory M. Wesley. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary. As part of this process, the Nominating Committee considers criteria for selecting candidates sufficient to identify a diverse group of qualified individuals to serve as trustees.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board of Trustees. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust’s Nominating Committee Charter. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust not later than 60 days prior to the shareholder meeting at which any such nominee would be voted on. Shareholder

recommendations for nominations to the Board of Trustees will be accepted on an ongoing basis and such recommendations will be kept on file for consideration when there is a vacancy on the Board of Trustees.

Trustee Compensation

The Independent Trustees receive from the Trust an annual retainer of \$100,000, \$4,500 for each regular Board meeting attended and \$1,000 for each special Board meeting attended, as well as reimbursement for expenses incurred in connection with attendance at Board meetings. Members of the Audit Committee receive \$2,000 for each meeting of the Audit Committee attended. The chairman of the Audit Committee receives an annual retainer of \$5,000. Interested Trustees do not receive any compensation for their service as Trustee. Independent Trustee fees are paid by the Adviser and not by the Fund under the Fund's unitary fee structure. Because the Fund had not commenced operations as of the date of this SAI, the following compensation figures represent estimates for the current fiscal period ending August 31, 2024:

Name of Person/Position	Estimated Aggregate Compensation from the Fund ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Estimated Total Compensation from the Fund and the Trust ⁽²⁾ Paid to Trustees
Dr. Michael D. Akers, Independent Trustee ⁽³⁾⁽⁴⁾	\$0	None	None	\$30,750
Gary A. Drska, Independent Trustee ⁽³⁾	\$0	None	None	\$25,750
Vincent P. Lyles, Independent Trustee ⁽³⁾	\$0	None	None	\$25,750
Erik K. Olstein, Independent Trustee ⁽³⁾	\$0	None	None	\$25,750
Lisa Zúñiga Ramírez, Independent Trustee ⁽³⁾	\$0	None	None	\$25,750
Gregory M. Wesley, Independent Trustee ⁽³⁾	\$0	None	None	\$25,750
John P. Buckel, Interested Trustee	None	None	None	None

(1) Trustees' fees and expenses are allocated among the Fund and any other series comprising the Trust.

(2) There are currently 31 other series comprising the Trust.

(3) Audit Committee member.

(4) Audit Committee chairman.

Principal Shareholders, Control Persons, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding Shares. A control person is a shareholder that owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund. As of the date of this SAI, there were no outstanding Shares of the Fund.

Investment Adviser

As stated in the Prospectus, investment advisory services are provided to the Fund by the Adviser, PT Asset Management, LLC (DBA: PTAM), pursuant to an investment advisory agreement (the "Advisory Agreement"). PTAM Holdings, LLC, an Illinois limited liability holding company, is a control person of the Adviser.

The Advisory Agreement with respect to the Fund is for an initial period of two years from its effective date, thereafter it continues in effect from year to year, only if such continuance is specifically approved at least annually by: (i) the Board of Trustees or the vote of a majority of the Fund's outstanding voting securities; and (ii) the vote of a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust, on behalf of the Fund, upon 60 days' written notice to the Adviser when authorized by either: (i) a majority vote of the outstanding voting securities of the Fund; or (ii) by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days' written notice to the Trust. The Advisory Agreement will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

The Adviser also serves as investment adviser to the Performance Trust Total Return Bond Fund (f/k/a Performance Trust Strategic Bond Fund), Performance Trust Municipal Bond Fund and Performance Trust Multisector Bond Fund (f/k/a Performance Trust Credit Fund), each an open-end mutual fund series of the Trust.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Fund a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.65% of the Fund's average daily net assets, as specified in the Prospectus. Pursuant to the Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund except interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (collectively, the "Excluded Expenses"), and the unitary management fee payable to the Adviser.

The Fund is new and has not paid management fees to the Adviser as of the date of this SAI.

Portfolio Managers

The following section provides information regarding each Portfolio Manager's other accounts managed, compensation, material conflicts of interests, and any ownership of securities in the Fund. The Portfolio Managers are shown together in this section only for ease in presenting the information and should not be viewed for purposes of comparing the Portfolio Managers or their firms against one another. Each firm is a separate entity that may employ different compensation structures, and may have different management requirements, and each Portfolio Manager may be affected by different conflicts of interest.

Other Accounts Managed by the Portfolio Managers

The table below identifies, for each Portfolio Manager of the Fund, the number of accounts managed (excluding the Fund) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. To the extent that any of these accounts are subject to an advisory fee based on account performance, this information is reflected in a separate table below. Asset amounts have been rounded and are approximate as of December 31, 2023.

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Based on Performance
G. Michael Plaiss				
Other Registered Investment Companies	3	\$6,943,632,851	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	2	\$12,943,720	0	\$0
Anthony J. Harris				
Other Registered Investment Companies	2	\$6,277,929,404	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	1	\$12,532,664	0	\$0
Mark Peiler				
Other Registered Investment Companies	2	\$6,848,182,732	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0
Lars Anderson				
Other Registered Investment Companies	2	\$6,277,929,404	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0
Michael Isroff				
Other Registered Investment Companies	1	\$95,450,119	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0

Material Conflicts of Interest

The Portfolio Managers' management of "other accounts" may give rise to potential conflicts of interest in connection with the management of the Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Managers could favor one account over another. Another potential conflict could include the Portfolio Managers' knowledge about the size, timing and possible market impact of Fund trades, whereby the Portfolio Managers could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

Portfolio Manager Compensation

The Adviser compensates the Portfolio Managers for their management of the Fund. Portfolio Managers are compensated with a cash salary based on industry standards, and a discretionary bonus. The bonus incentives are tied primarily to investment performance and related goals.

Portfolio Managers' Ownership of the Fund

The Fund is required to show the dollar ranges of the Portfolio Managers' "beneficial ownership" of Shares as of the end of the most recently completed fiscal year or a more recent date for a new portfolio manager. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. As of the date of this SAI the Portfolio Managers did not beneficially own any Shares.

As of the date of this SAI, the Fund had not commenced operations, and consequently, the portfolio managers did not own any shares of the Fund.

Service Providers

Fund Administrator, Transfer Agent and Fund Accountant

Pursuant to a fund administration servicing agreement (the "Administration Agreement") between the Trust and Fund Services, 615 East Michigan Street, Milwaukee, Wisconsin, 53202, Fund Services acts as the Fund's administrator. Fund Services provides certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund's independent contractors and agents; preparing for signature by an officer of the Trust all of the documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, Fund Services does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Shares.

Pursuant to the Administration Agreement, as compensation for its services, Fund Services receives a combined fee for fund administration and fund accounting services based on the Fund's current average daily net assets. Fund Services is also entitled to be reimbursed for certain out-of-pocket expenses. In addition to its role as Administrator, Fund Services also acts as fund accountant,

transfer agent (“Transfer Agent”) and dividend disbursing agent under separate agreements with the Trust.

The Fund is new and the Administrator has not received any fees for administrative services to the Fund as of the date of this SAI.

Custodian

U.S. Bank National Association, an affiliate of Fund Services (the “Custodian”), is the custodian of the Fund’s assets pursuant to a custody agreement between the Custodian and the Trust on behalf of the Fund, whereby the Custodian charges fees on a transactional basis plus out-of-pocket expenses. The Custodian has custody of all assets and securities of the Fund, delivers and receives payments for securities sold, receives and pays for securities purchased, collects income from investments and performs other duties, all as directed by the officers of the Trust. The Custodian’s address is 1555 North River Center Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund. The Custodian and its affiliates may participate in revenue sharing arrangements with service providers of funds in which the Fund may invest.

Legal Counsel

Godfrey & Kahn, S.C., 833 East Michigan Street, Suite 1800, Milwaukee, Wisconsin 53202, serves as legal counsel to the Fund and the Independent Trustees.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd. (“Cohen”) serves as the independent registered public accounting firm for the Fund. Cohen audits and reports on the Fund’s annual financial statements, reviews certain regulatory reports and the Fund’s federal income tax returns, and performs other auditing and tax services for the Fund when engaged to do so.

Distribution and Servicing of Shares

The Trust and Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group, LLC d/b/a ACA Group (the “Distributor”), are parties to a distribution agreement (“Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Fund and distributes Shares on a best efforts basis. Shares are continuously offered for sale by the Distributor only in Creation Units. The Distributor will not distribute Shares in amounts less than a Creation Unit and does not maintain a secondary market in Shares. The principal business address of the Distributor is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of FINRA. The Distributor is not affiliated with the Fund, the Adviser, or any other service provider for the Fund.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will review orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor is a broker-dealer registered under the 1934 Act and a member of FINRA.

The Distributor may also enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of Shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in “Procedures for Purchase of Creation Units” below) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable annually thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on no less than 60 days' written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the Trustees who are not "interested persons" (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distribution Agreement of the Distributor. The Distribution Agreement will automatically terminate in the event of its "assignment" (as defined in the 1940 Act), or by the Distributor on 60 days' written notice.

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. Purchases and sales of securities in the OTC market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that the Fund will be holding, unless the Adviser believes that better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by FINRA and the SEC. Portfolio transactions may also be placed with broker-dealers in which the Adviser has invested on behalf of the Fund and/or client accounts.

While it is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Advisers, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the

spread to be paid to a dealer, the Fund may pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts of the Adviser. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as they desire, or they may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of their duties with respect to any of their accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practicable, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law.

Brokers or dealers selected to execute the Fund's portfolio transactions may include the Fund's Authorized Participants or their affiliates. An Authorized Participant or its affiliates may be selected to execute the Fund's portfolio transactions in conjunction with an all cash creation unit order or an order including "cash in lieu." As described below under "Purchase and Redemption of Shares in Creation Units, Creation Transaction Fee" and "Redemption Transaction Fee," the Fund may determine to not charge a variable fee on certain order when the Adviser has determined that doing so is in the best interests of Fund shareholders, even if the decision to not charge a variable fee could be viewed as benefiting the Authorized Participant or its affiliate selected to execute the Fund's portfolio transaction in connection with such orders.

Brokerage Commissions

The Fund is new and had not paid any brokerage commissions as of the date of this SAI.

Securities of “Regular Broker-Dealers”

The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) that it may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of the Fund are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Fund; or (iii) sold the largest dollar amounts of the Shares. Because the Fund is new, as of the date of this SAI, the Fund does not hold any securities of “regular broker-dealers.”

Portfolio Turnover

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund’s portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction and brokerage commission costs and may generate capital gains, including short-term capital gains taxable to shareholders at ordinary income rates. To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund. Furthermore, a high portfolio turnover rate may result in a greater number of taxable transactions.

Code of Ethics

The Trust and the Adviser have each adopted a Code of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics permit, subject to certain conditions, personnel of the Adviser to invest in securities that may be purchased or held by the Fund. The Distributor relies on the principal underwriter’s exception under Rule 17j-1(c)(3) from the requirement to adopt a code of ethics pursuant to Rule 17j-1 because the Distributor is not affiliated with the Trust or the Adviser, and no officer, director, or general partner of the Distributor serves as an officer or director of the Trust or the Adviser.

Proxy Voting Procedures

The Board of Trustees has adopted proxy voting policies and procedures (“Proxy Policies”) on behalf of the Trust which delegate to the Adviser the responsibility for voting proxies relating to portfolio securities held by the Fund as part of its investment advisory services, subject to the supervision and oversight of the Board. Notwithstanding this delegation of responsibilities, however, the Fund retains the right to vote proxies relating to its portfolio securities. The fundamental purpose of the Proxy Policies is to ensure that each vote will be in a manner that reflects the best interest of the Fund and its shareholders, taking into account the value of the Fund’s investments.

The Adviser’s Proxy Policies

The Adviser believes proxy voting is an important right of the shareholders and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised. While the Adviser’s clients generally hold fixed-income securities in their accounts, the Adviser may come

across proxies on equity securities which will require the Adviser to exercise a voice on its clients' behalf.

The Adviser has adopted and implemented Proxy Voting Policies and Procedures, which the Adviser applies to clients over which it has voting authority, including changes in corporate governance structures, the adoption or amendment of compensation plans (including stock options), and matters involving social issues. For those advisory clients who have retained proxy voting responsibility, the Adviser has no authority and will not vote any proxies for those client portfolios.

Policy

As a matter of policy and practice, the Adviser utilizes the proxy voting services of an unaffiliated third-party vendor, ProxyEdge, an electronic voting platform provided by Broadridge Financial Solutions Inc., to vote proxies pursuant to the established and published voting guidelines of Glass Lewis & Co. ("Glass Lewis"), a leading, independent provider of global proxy research and voting recommendations.

Conflicts of Interest

The Adviser is in the investment advisory business and does not engage in any investment banking or corporate finance activity, nor does it produce research for publication. Therefore, it is unlikely that conflicts will arise very frequently in the proxy voting context. Nevertheless, conflicts may arise.

To avoid a material conflict of interest over proxy voting between the Adviser and the client, the Adviser votes client shares via ProxyEdge, an electronic voting platform provided by Broadridge Financial Solutions Inc., and in accordance with Glass Lewis's recommendations.

The Adviser expects that it will, in most instances, authorize ProxyEdge to vote in accordance with Glass Lewis' recommendations with respect to specific proxy issues; however, the Adviser may authorize ProxyEdge to vote shares inconsistent with Glass Lewis' recommendations if it believes it is in the best interest of the client and such a vote does not create a conflict of interest between the Adviser and the client. If the Adviser votes shares inconsistent with Glass Lewis' recommendation, it will maintain a copy of such explanation on file.

The actual voting records relating to portfolio securities during the most recent 12-month period ended June 30th will be available without charge, upon request, by calling toll-free, 1-877-738-9095 or by accessing the SEC's website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the "USA PATRIOT Act") and related anti-money laundering laws and regulations. To ensure compliance with these laws, the Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. Ms. Deanna B. Marotz has been designated as the Trust's Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to: determining that the Distributor

and the Transfer Agent have established proper anti-money laundering procedures; reporting suspicious and/or fraudulent activity.

Portfolio Holdings Information

The Trust's Board of Trustees has adopted a policy regarding the disclosure of information about the Fund's security holdings. The Fund's entire portfolio holdings are publicly disseminated each day the Fund is open for business and may be available through financial reporting and news services, including publicly available internet web sites. In addition, the composition of the Deposit Securities is publicly disseminated daily prior to the opening of the Exchange via the facilities of the National Securities Clearing Corporation ("NSCC").

Determination of Net Asset Value

The NAV of the Fund's shares will fluctuate and is determined as of the close of trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m., Eastern time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open on the following days: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement. If the NYSE closes early, the Fund will calculate the NAV as of the close of trading on the NYSE on that day. If an emergency exists as permitted by the SEC, the NAV may be calculated at a different time.

The NAV per share is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value Per Share}$$

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Adviser pursuant to the Adviser's fair valuation procedures subject to oversight by the Board of Trustees.

Each equity security owned by the Fund, including depository receipts, that is traded on a national securities exchange, except for securities listed on the NASDAQ Stock Market LLC ("NASDAQ"), is valued at its last sale price on the exchange on which such security is traded, as of the close of business on the day the security is being valued. All equity securities that are not traded on a listed exchange are valued at the last sale price at the close of the OTC market. If a non-exchange listed security does not trade on a particular day, then the mean between the last quoted bid and asked price will be used as long as it continues to reflect the value of the security.

Securities that are traded on more than one exchange are valued using the price of the exchange that the Fund generally considers to be the principal exchange on which the security is traded. Fund securities listed on NASDAQ shall be valued using the NASDAQ Official Closing Price, which may not necessarily represent the last sales price. If there has been no sale on such exchange or on NASDAQ on such day, the security will be valued at the mean between the most recent quoted bid and asked prices at the close of the exchange on such day, or the security shall be valued at the

latest sales price on the “composite market” for the day such security is being valued. The composite market is defined as a consolidation of the trade information provided by a national securities and foreign exchange and OTC markets as published by an approved independent pricing service (“Pricing Service”).

Money market instruments are valued at cost. If cost does not represent current market value the securities will be priced at fair value.

Debt securities, including short-term debt instruments having a maturity of 60 days or less and municipal securities, are valued at the mean in accordance with prices provided by a Pricing Service. Pricing Services may use various valuation methodologies such as the mean between the bid and the asked prices, matrix pricing and other analytical pricing models as well as market transactions and dealer quotations. If a price is not available from a Pricing Service, the most recent quotation obtained from one or more broker-dealers known to follow the issue will be obtained. Pricing Service quotations will be valued at the mean between the bid and the offer. In the absence of available quotations, the securities will be priced at fair value. Fixed income securities purchased on a delayed-delivery basis are typically marked to market daily until settlement at the forward settlement date. Any discount or premium is accrued or amortized using the constant yield 2 method until maturity.

Exchange traded options are valued at the composite price, using the National Best Bid and Offer quotes (“NBBO”). NBBO consists of the highest bid price and lowest ask price across any of the exchanges on which an option is quoted, thus providing a view across the entire U.S. options marketplace. Specifically, composite pricing looks at the last trades on the exchanges where the options are traded. If there are no trades for the option on a given business day composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

Pursuant to Rule 2a-5 of the 1940 Act, all other assets of the Fund are valued in such manner as the Adviser in good faith deems appropriate to reflect their fair value.

Book-Entry Only System

The Depository Trust Company (“DTC”) acts as securities depository for Shares. Shares are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Except in limited circumstances set forth below, certificates will not be issued for Shares.

DTC is a limited-purpose trust company that was created to hold securities of its participants (the “DTC Participants”) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the New York Stock Exchange (“NYSE”) and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers, and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants, and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial

interests in Shares (owners of such beneficial interests are referred to in this SAI as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares. The Trust recognizes DTC or its nominee as the record owner of all Shares for all purposes. Beneficial Owners of Shares are not entitled to have Shares registered in their names, and will not receive or be entitled to physical delivery of Share certificates. Each Beneficial Owner must rely on the procedures of DTC and any DTC Participant and/or Indirect Participant through which such Beneficial Owner holds its interests, to exercise any rights of a holder of Shares.

Conveyance of all notices, statements, and other communications to Beneficial Owners is effected as follows. DTC will make available to the Trust upon request and for a fee a listing of Shares held by each DTC Participant. The Trust shall obtain from each such DTC Participant the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement, or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in the Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in Shares, or for maintaining, supervising, or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Fund at any time by giving reasonable notice to the Fund and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

Purchase and Redemption of Shares in Creation Units

The Trust issues and sells Shares only in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees, if applicable), at their NAV per share next determined after receipt of an order, on any Business Day, in proper form pursuant to the

terms of the Authorized Participant Agreement (“Participant Agreement”). The NAV of Shares is calculated each business day as of the scheduled close of regular trading on the NYSE, generally 4:00 p.m., Eastern Time. The Fund will not issue fractional Creation Units. A “Business Day” is any day on which the NYSE is open for business.

Fund Deposit. The consideration for purchase of a Creation Unit of the Fund generally consists of the in-kind deposit of the Deposit Securities and the Cash Component, computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any or all of the Deposit Securities. When accepting purchases of Creation Units for all or a portion of Deposit Cash, the Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser. Pursuant to Rule 6c-11 of the 1940 Act, the Fund may utilize baskets that are not representative of the Fund’s portfolio referred to as custom baskets.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The “Cash Component” is an amount equal to the difference between the NAV of Shares (per Creation Unit) and the value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant (as defined below).

The Fund, through NSCC, makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of Shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of Shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for the Fund changes from time to time.

The Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit

Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”).

Procedures for Purchase of Creation Units. To be eligible to place orders with the Transfer Agent to purchase a Creation Unit of the Fund, an entity must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the creation transaction fee (described below), if applicable, and any other applicable fees and taxes.

All orders to purchase Shares directly from the Fund must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. Such order to purchase Creation Units must be received by the Distributor or its agent no later than the order cut-off time designated by the Fund on any Business Day to receive that day’s NAV. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase Shares directly from the Fund in Creation Units must be placed by the investor’s broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund’s investments are primarily traded is closed, the Fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Transfer Agent pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. On behalf of the Fund, the Transfer Agent will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Transfer Agent by the cut-off time on such Business Day. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a sub-custody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the sub-custodian of the Fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such

securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian. A Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the Fund or its agents by no later than 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agents do not receive all of the Deposit Securities, or the required Deposit Cash in lieu thereof, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. The "Settlement Date" for the Fund is generally the second Business Day after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received by the Custodian in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Transfer Agent, such canceled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received on the Settlement Date, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. A creation request is in "proper form" if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

Issuance of a Creation Unit. Except as provided in this SAI, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Transfer Agent and the Adviser shall be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the second Business Day following the day on which the purchase order is deemed received by the Transfer Agent. The Authorized Participant shall be liable to the Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the Shares on the date the order is placed in proper form since, in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the "Additional Cash Deposit"), which shall be maintained in a separate non-interest bearing collateral account. The Authorized Participant must deposit with the Custodian the Additional Cash Deposit,

as applicable, by 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agent does not receive the Additional Cash Deposit in the appropriate amount, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the value of such Deposit Securities on the day the purchase order was deemed received by the Transfer Agent plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as described below under "Creation Transaction Fee," may be charged. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

Acceptance of Orders of Creation Units. The Trust reserves the absolute right to reject an order for Creation Units transmitted to it by the Transfer Agent with respect to the Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining Shares ordered, would own 80% or more of the currently outstanding Shares of the Fund; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; (g) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (h) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units.

Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, a sub-custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Transfer Agent, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

All questions as to the number of Shares of each security in the Deposit Securities and the validity form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee. A fixed purchase (*i.e.*, creation) transaction fee, payable to the Fund's custodian, may be imposed for the transfer and other transaction costs associated with the purchase of Creation Units ("Creation Order Costs"). The standard fixed creation transaction fee for the Fund is \$500, regardless of the number of Creation Units created in the transaction. The Fund may adjust the standard fixed creation transaction fee from time to time. The fixed creation fee may be waived on certain orders if the Fund's custodian has determined to waive some or all of the Creation Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

In addition, a variable fee, payable to the Fund, of up to a maximum percentage of 3% of the value of the Creation Units subject to the transaction may be imposed for cash purchases, non-standard orders, or partial cash purchases of Creation Units. The variable charge is primarily designed to cover additional costs (*e.g.*, brokerage, taxes) involved with buying the securities with cash. The Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, *e.g.*, for creation orders that facilitate the rebalance of the Fund's portfolio in a more tax efficient manner than could be achieved without such order.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Fund to their account or on their order.

Risks of Purchasing Creation Units. There are certain legal risks unique to investors purchasing Creation Units directly from the Fund. Because Shares may be issued on an ongoing basis, a "distribution" of Shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from the Fund, breaks them down into the constituent Shares, and sells those Shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary-market demand for Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with Shares as part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act.

Redemption. Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Transfer Agent and only on a Business Day. EXCEPT UPON LIQUIDATION OF THE FUND, THE FUND WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS. Investors must accumulate enough Shares in the secondary market to constitute a Creation Unit to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur

brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the list of the names and Share quantities of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of the Fund, redemption proceeds for a Creation Unit will consist of Fund Securities—as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the NAV of Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee, as applicable, as set forth below. If the Fund Securities have a value greater than the NAV of Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

Redemption Transaction Fee. A fixed redemption transaction fee, payable to the Fund's custodian, may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units ("Redemption Order Costs"). The standard fixed redemption transaction fee for the Fund is \$500, regardless of the number of Creation Units redeemed in the transaction. The Fund may adjust the redemption transaction fee from time to time. The fixed redemption fee may be waived on certain orders if the Fund's custodian has determined to waive some or all of the Redemption Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

In addition, a variable fee, payable to the Fund, of up to a maximum percentage of 3% of the value of the Creation Units subject to the transaction may be imposed for cash redemptions, non-standard orders, or partial cash redemptions (when cash redemptions are available) of Creation Units. The variable charge is primarily designed to cover additional costs (e.g., brokerage, taxes) involved with selling portfolio securities to satisfy a cash redemption. The Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, e.g., for redemption orders that facilitate the rebalance of the Fund's portfolio in a more tax efficient manner than could be achieved without such order.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Fund to their account or on their order.

Procedures for Redemption of Creation Units. Orders to redeem Creation Units of the Fund must be submitted in proper form to the Transfer Agent no later than the order cut-off time designated by the Fund on any business day. A redemption request is considered to be in "proper form" if (i) an Authorized Participant has transferred or caused to be transferred to the Trust's

Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor's Shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

The Authorized Participant must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the Shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

Additional Redemption Procedures. In connection with taking delivery of Shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or Authorized Participant acting on behalf of such shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank, or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will generally be made within two business days of the trade date.

The Trust may in its discretion exercise its option to redeem such Shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee, if applicable, and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of Shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserve the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of the Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an

Authorized Participant that is not a “qualified institutional buyer,” (“QIB”) as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status to receive Fund Securities.

Because the portfolio securities of the Fund may trade on other exchanges on days that the Exchange is closed or are otherwise not Business Days for the Fund, shareholders may not be able to redeem their Shares, or to purchase or sell Shares on the Exchange, on days when the NAV of the Fund could be significantly affected by events in the relevant foreign markets.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of Shares or determination of the NAV of the Shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Federal Income Tax Matters

This section is not intended to be a full discussion of federal income tax laws and the effect of such laws on you.

The following is only a summary of certain U.S. federal income tax considerations generally affecting the Fund and their shareholders that supplements the discussion in the Prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Fund or their shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning.

The following general discussion of certof 1986, as amended (the “Code”) and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Shareholders are urged to consult their own tax advisors regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, foreign or local taxes.

Taxation of the Funds. The Fund will elect and intends to qualify each year to be treated as a regulated investment company (“RIC”) under Subchapter M of the Code. As such, the Fund should not be subject to federal income taxes on its net investment income and capital gains, if any, to the extent that it timely distributes such income and capital gains to its shareholders. Generally, to qualify for treatment as a RIC, the Fund must distribute in each taxable year at least 90% of their “investment company taxable income” for the taxable year, which includes, among other items, dividends, interest, net short-term capital gain and net foreign currency gain, less expenses, as well as 90% of their net tax-exempt interest income, if any (the “Distribution Requirement”) and must meet several additional requirements. Among these requirements are the following: (i) at least 90% of the Fund’s gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to its business of investing in such stock,

securities or foreign currencies and net income derived from interests in qualified publicly traded partnerships (the “Qualifying Income Requirement”); and (ii) at the end of each quarter of the Fund’s taxable year, the Fund’s assets must be diversified so that (a) at least 50% of the value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the Fund’s total assets and to not more than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Diversification Requirement”).

To the extent the Fund makes investments that may generate income that is not qualifying income, including certain derivatives, the Fund will seek to restrict the resulting income from such investments so that the Fund’s non-qualifying income does not exceed 10% of its gross income.

Although the Fund intends to distribute substantially all of their net investment income and may distribute their capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed. The Fund is treated as a separate corporation for federal income tax purposes. The Fund therefore is considered a separate entity in determining its treatment under the rules for RICs described herein. The requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If the Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the Diversification Requirement where the Fund corrects the failure within a specified period of time. To be eligible for the relief provisions with respect to a failure to meet the Diversification Requirement, the Fund may be required to dispose of certain assets. If these relief provisions were not available to the Fund and it were to fail to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable to the shareholders of the Fund as ordinary income dividends, subject to the dividends received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders, subject to certain limitations. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. If the Fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay the Fund-level tax on certain net built in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund determines that it will not qualify as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund’s NAV.

The Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against a RIC’s net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, the Fund may carry a net capital loss from any taxable year forward indefinitely to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to the Fund and may not be distributed as capital gains to its shareholders. Generally, the Fund may not carry forward any losses other than net capital losses. The carryover of capital losses may be limited under the general loss limitation rules if the Fund experience an ownership change as defined in the Code.

The Fund will be subject to a nondeductible 4% federal excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for either the one-year period ending on October 31 of that year, or if the Fund makes an election under Section 4982(e)(4) of the Code, the Fund’s fiscal year, subject to an increase for any shortfall in the prior year’s distribution. The Fund intends to declare and distribute dividends and distributions in the amounts and at the times necessary to avoid the application of the excise tax, but can make no assurances that all such tax liability will be eliminated.

If the Fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax at regular corporate rates to the extent any such income or gains are not distributed. The Fund may elect to designate certain amounts retained as undistributed net capital gain as deemed distributions in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their tax liabilities, and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their Shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits.

Taxation of Shareholders – Distributions. The Fund intends to distribute annually to its shareholders substantially all of its investment company taxable income (computed without regard to the deduction for dividends paid), its net tax-exempt income, if any, and any net capital gain (net long-term capital gains in excess of net short-term capital losses, taking into account any capital loss carryforwards). The distribution of investment company taxable income (as so computed) and net realized capital gain will be taxable to Fund shareholders regardless of whether the shareholder receives these distributions in cash or reinvests them in additional Shares.

The Fund (or your broker) will report to shareholders annually the amounts of dividends paid from ordinary income, the amount of distributions of net capital gain, the portion of dividends which may

qualify for the dividends received deduction for corporate shareholders, and the portion of dividends which may qualify for treatment as qualified dividend income, which is taxable to non-corporate shareholders at long-term capital gain rates.

Qualified dividend income includes, in general, subject to certain holding period and other requirements, dividend income from taxable domestic corporations and certain “qualified foreign corporations.” Subject to certain limitations, “qualified foreign corporations” include those incorporated in possessions of the United States, those incorporated in certain countries with comprehensive tax treaties with the United States, and other foreign corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Dividends received by the Fund from an ETF or an underlying fund taxable as a RIC or a real estate investment trust (“REIT”) may be treated as qualified dividend income generally only to the extent so reported by such ETF, underlying fund or REIT. If 95% or more of the Fund’s gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

Fund dividends will not be treated as qualified dividend income if the Fund does not meet holding period and other requirements with respect to dividend paying stocks in its portfolio, or the shareholder does not meet holding period and other requirements with respect to the Shares on which the dividends were paid. Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Distributions from the Fund’s net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares. Distributions may be subject to state and local taxes.

In the case of corporate shareholders, certain dividends received by the Fund from U.S. corporations (generally, dividends received by the Fund in respect of any share of stock (1) with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend and (2) that is held in an unleveraged position) and distributed and appropriately so reported by the Fund may be eligible for the 50% dividends-received deduction. Certain preferred stock must have a holding period of at least 91 days during the 181-day period beginning on the date that is 90 days before the date on which the stock becomes ex-dividend as to that dividend to be eligible. Capital gain dividends distributed to the Fund from other RICs are not eligible for the dividends-received deduction. To qualify for the deduction, corporate shareholders must meet the minimum holding period requirement stated above with respect to their Shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Shares, and, if they borrow to acquire or otherwise incur debt attributable to Shares, they may be denied a portion of the dividends-received deduction with respect to those Shares.

Although dividends generally will be treated as distributed when paid, any dividend declared by the Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a Net Investment Income (“NII”) tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer’s investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer’s modified adjusted gross income exceeds certain thresholds (\$250,000 for married

individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). Exempt-interest dividends are not includable in a shareholder's investment income for purposes of the NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

Shareholders who have not held Shares for a full year should be aware that the Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the applicable shareholder's period of investment in the Fund. A taxable shareholder may wish to avoid investing in the Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund's distributions exceed its earnings and profits, all or a portion of the distributions made for a taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and result in a higher capital gain or lower capital loss when the Shares on which the distribution was received are sold. After a shareholder's basis in the Shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder's Shares.

Taxation of Shareholders – Sale of Shares. A sale or redemption of Shares may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as long-term capital gain or loss if Shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of Shares will generally be treated as short-term capital gain or loss. Any loss realized upon a taxable disposition of Shares held for six months or less will be treated as long-term capital loss, rather than short-term capital loss, to the extent of any amounts treated as distributions to the shareholder of long-term capital gain with respect to such Shares (including any amounts credited to the shareholder as undistributed capital gains). Further, any loss realized upon a taxable disposition of Shares held for six months or less will be disallowed to the extent of the amount of exempt-interest dividends, if any, received by the shareholder with respect to such Shares. All or a portion of any loss realized upon a taxable disposition of Shares may be disallowed if substantially identical Shares are acquired (through the reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after the disposition. In such a case, the basis of the newly acquired Shares will be adjusted to reflect the disallowed loss.

The cost basis of Shares acquired by purchase will generally be based on the amount paid for Shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot currently be deducted, under the rules governing "wash sales" (for a person who does not mark-to-market its portfolio) or, on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will generally be treated as short-term capital gains or losses. Any loss upon a redemption of Creation Units held for six months or less may be treated as long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gain with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust, on behalf of the Fund, has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares and if, pursuant to Section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Trust also has the right to require the provision of information necessary to determine beneficial Share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss may be deductible.

Backup Withholding. The Fund will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to backup withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to "backup withholding"; or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is at a rate set under Section 3406 of the Code. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. federal income tax liability. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the U.S.

Non-U.S. Shareholders. Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year (based on a formula that factors in presence in the U.S. during the two preceding years as well). Foreign shareholders who fail to provide an applicable Internal Revenue Service (“IRS”) form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under the Foreign Account Tax Compliance Act (“FATCA”), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the IRS the identity of certain of its accountholders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

For foreign shareholders to qualify for an exemption from backup withholding, described above, the foreign shareholder must comply with special certification and filing requirements. Foreign shareholders in the Fund should consult their tax advisors in this regard.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k) plans, and other tax-exempt

entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under the current rules and regulations, tax-exempt entities are generally not permitted to offset losses from one unrelated trade or business against the income or gain of another unrelated trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders with respect to their shares of Fund income. However, notwithstanding the foregoing, tax-exempt shareholders could realize UBTI by virtue of their investment in the Fund if, for example, (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits (“REMICs”), (ii) the Fund invests in a REIT that is a taxable mortgage pool (“TMP”) or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) Shares constitute debt-financed property in the hands of the tax-exempt shareholders within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisers. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisers regarding these issues.

Certain Potential Tax Reporting Requirements. Under U.S. Treasury regulations, if a shareholder recognizes a loss on disposition of Shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Other Issues. In those states which have income tax laws, the tax treatment of the Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

Distributions

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Dividends, Distributions and Taxes.”

General Policies. Dividends from net investment income, if any, are declared and paid at least monthly by the Fund. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust.

The Fund makes additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Code. Management of the Trust reserves the right to declare

special dividends if, in its reasonable discretion, such action is necessary or advisable to preserve the Fund's eligibility for treatment as a RIC or to avoid imposition of income or excise taxes on undistributed income at the Fund level.

Dividend Reinvestment Service. The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares issued by the Trust of the Fund at NAV per Share. Distributions reinvested in additional Shares will nevertheless be taxable to Beneficial Owners acquiring such additional Shares to the same extent as if such distributions had been received in cash.

Financial Statements

Because the Fund has recently commenced operations, there are no financial highlights available at this time.
